Under current law, if school boards enter into a shared services agreement that requires transportation of pupils in one district to attend a course offered in another district participating in the agreement, the school board providing that transportation is not eligible to receive state aid for the cost of transporting those pupils. Under s. 121.58 (2), Stats., state aid for transportation is an annual amount per transported pupil which varies according to the distance from a pupil's residence to the school in which the pupil is enrolled, as follows:

ASSEMBLY BILL 192

If at least 2 miles and not more than 5 miles, \$35 per school year.

If more than 5 miles and not more than 8 miles, \$55 per school year.

If more than 8 miles and not more than 12 miles, \$110 per school year.

If more than 12 miles, \$375 per school year.

Under the bill, a school board that has entered into a shared services agreement with one or more school boards to provide transportation to pupils enrolled in a participating school district for the purpose of pupils attending a course offered as a shared service under the agreement at a physical location in the school district must be paid transportation aid. Under the bill, aid for this type of transportation must be paid at the rates provided in current law, according to the distance from the school in which the pupil is enrolled to the school at which the shared services course is offered.

The bill requires that state aid paid to a school board that provides this type of transportation must be reduced proportionally based on the number of instructional days for which the transportation is provided.

The bill requires that this type of transportation be reimbursed from the current transportation categorical aid beginning in the 2024-25 school year and increases this appropriation by \$150,000 in fiscal year 2024-25 for this purpose.
