FOR 2009-11 BUDGET -- NOT READY FOR INTRODUCTION

1 AN ACT ...; **relating to:** the budget.

Analysis by the Legislative Reference Bureau

STATE GOVERNMENT

PUBLIC UTILITY REGULATION

Under current law, DOA must determine the amount of a monthly low-income assistance fee that electric utilities are required to charge customers. The fees are used to fund various low-income energy assistance programs. Some of the fees are also used to help fund the Wisconsin Works program, which provides work experience and benefits for low-income custodial parents. Current law imposes certain requirements on DOA's determination of the amount of the fee, including a requirement that the monthly fee may not exceed the lesser of $750 or 3 percent of the customer's total charges for the month. This bill changes the foregoing requirement so that the monthly fee may not exceed the lesser of $750 or the sum of the foregoing 3 percent and a percentage of the customer's total charges for the month that, as determined by DOA, is sufficient to generate the amounts used to help fund the Wisconsin Works program.

Current law also requires DOA to promulgate rules establishing the amount of the fee. For a fiscal year, the rules must establish the fee in the amount resulting from subtracting a specified sum from the amount needed for assisting low-income customers as determined under a formula under current law. One component of the specified sum is the amount of funding received by the state under federal programs that provide energy assistance to low-income customers. Under this bill, for fiscal

years 2009-10 and 2010-11, the amount of funding received under the federal programs that is attributable to federal economic stimulus funds must be deducted from the sum. The bill requires DOA to promulgate emergency rules for making the required deduction.

Under current law, DOA administers federally funded programs for providing weatherization and energy assistance to low-income households. Current law requires DOA to transfer in each fiscal year 15 percent of the federal funding for the energy assistance program to the weatherization program. This bill allows, but does not require, DOA to make the transfer. In addition, the bill requires DOA to deduct its administrative expenses for the program before making a transfer. Also, the bill eliminates a program revenue appropriation that is no longer required for DOA to administer the program.

Also under current law, DOA administers a program for making grants from the utility public benefits fund (UPBF) to provide assistance to low-income households for weatherization and other energy conservation services, payment of energy bills, and early identification or prevention of energy crises. In each fiscal year, DOA must ensure that the amount made in grants for weatherization and other energy conservation services is equal to 47 percent of the sum of the following: 1) the amounts received under the federally funded weatherization and energy-assistance programs mentioned above; 2) the amount spent by certain electric and natural gas utilities on assistance to low-income households; 3) the amount spent on all programs funded by the UPBF; and 4) the amount of monthly low-income assistance fees that certain municipal electric utilities and electric retail cooperatives are required to collect from their customers and members.

Instead of requiring DOA to ensure that 47 percent of the foregoing sum is spent in fiscal years 2009-10 to 2011-12 on grants for weatherization and other energy conservation services, this bill requires DOA to ensure that at least $75,000,000 is spent in a fiscal year on such grants. In addition, in fiscal years 2010-11 and 2011-12, DOA must increase the amount spent on such grants to reflect the cost-of-living increase that occurred during the previous fiscal year. Beginning in fiscal year 2012-13, DOA must ensure that 47 percent of the foregoing sum is spent on such grants, as is required under current law.

Also under current law, DOA has created a Division of Energy to administer federal and state programs for providing assistance to low-income households for weatherization, energy conservation, payment of energy bills, and other energy-related services. This bill transfers responsibility to administer the programs from DOA to the PSC effective January 1, 2010.

For further information see the ***state*** fiscal estimate, which will be printed as an appendix to this bill.
