### *Analysis by the Legislative Reference Bureau*

This bill makes various changes to the rule-making process with respect to proposed administrative rules considered at the joint annual spring fish and wildlife

**SENATE BILL 608**

rule hearing of the Department of Natural Resources and county meeting of the Wisconsin Conservation Congress (spring DNR-WCC meeting).

***Gubernatorial approval and statements of scope for proposed rules***

Current law requires a statement of scope of a proposed rule to be approved by the governor before a state employee or official may perform any activity in connection with the drafting of the proposed rule. Under this bill, for rules that were considered at the spring DNR-WCC meeting, only the Natural Resources Board (board) is required to approve a statement of scope before those activities may be performed.

Under current law, a state agency must prepare and obtain approval of a revised statement of scope if, after a statement of scope is approved, the agency changes the scope of the proposed rule in any meaningful or measurable way. Under the bill, this requirement does not apply to rules that were considered at the spring DNR-WCC meeting.

Under current law, a state agency must prepare and obtain approval of a statement of scope for a proposed emergency rule in the same manner as a statement of scope is prepared and approved for a nonemergency rule. Under the bill, a statement of scope is not required for emergency rules considered at the spring DNR-WCC meeting.

Current law requires a state agency to submit a proposed rule in final draft form to the governor for approval before the rule may be submitted to the legislature for review and to submit a proposed emergency rule in final draft form to the governor for approval before the emergency rule may be filed with the Legislative Reference Bureau for publication. The bill eliminates these requirements for gubernatorial approval for rules that were considered at the spring DNR-WCC meeting.

Finally, the bill permits automatic approval of a statement of scope for rules that were considered at the spring DNR-WCC meeting if the board does not disapprove the statement of scope within 30 days after it is presented to the board, or by the eleventh day after its publication in the Wisconsin Administrative Register, whichever is later.

***Economic impact analyses for proposed rules***

***When report must be prepared.*** Current law requires each state agency to prepare an economic impact analysis for all rules proposed by the agency. It also requires the Department of Administration to issue a report on a proposed rule, and the secretary of administration (secretary) to approve a proposed rule, if the economic impact analysis indicates that a total of \$20,000,000 or more in implementation and compliance costs are reasonably expected to be incurred by or passed along to businesses, local governmental units, and individuals as a result of the proposed rule. In addition, current law requires a state agency to prepare a revised economic impact analysis if a proposed rule is modified after the original economic impact analysis is submitted so as to significantly change the economic impact of the proposed rule.

Under this bill, for rules that were considered at the spring DNR-WCC meeting, an economic impact analysis is required only if the secretary directs the analysis to be prepared on the petition of a municipality; an association that

**SENATE BILL 608**

represents a farm, labor, business, or professional group; or five or more persons who would be affected by the proposed rule. The bill requires the secretary to direct the preparation of such an analysis if 1) the proposed rule would cost affected persons \$20,000,000 or more during each of the first five years after the rule's implementation to comply with the rule; or 2) the rule would adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities.

***Content of analysis.*** Current law requires certain information to be included in an economic impact analysis, including all of the following:

1. An analysis of the economic impact of the proposed rule, including information on the economic effect on specific businesses, business sectors, public utility ratepayers, local governmental units, and the state's economy as a whole.

2. An analysis of alternatives to the proposed rule, including the alternative of not promulgating the rule.

3. A determination made in consultation with the businesses, local governmental units, and individuals potentially affected by the proposed rule as to whether the proposed rule would adversely affect in a material way the economy, a sector of the economy, productivity, jobs, or the overall economic competitiveness of this state.

4. Comparisons with the approaches used by the federal government and by Illinois, Iowa, Michigan, and Minnesota to address the policy problem that the proposed rule is intending to address and, if the approach chosen by the agency to address that policy problem is different from those approaches, a statement as to why the agency chose a different approach.

5. An assessment of how effective the proposed rule will be in addressing the policy problem that the rule is intended to address.

This bill eliminates the requirements that this information be included in an economic impact analysis for rules that were considered at the spring DNR-WCC meeting. Under this bill, an economic impact analysis that is required for rules that were considered at the spring DNR-WCC meeting must instead contain information on the effect of the proposed rule on specific businesses, business sectors, and the state's economy and must include all of the following: 1) an analysis and quantification of the problem, including any risks to public health or the environment, that the rule is intending to address; 2) an analysis and quantification of the economic impact of the rule, including costs reasonably expected to be incurred by the state, businesses, governmental units, and affected individuals; and 3) an analysis of benefits of the rule, including how the rule reduces the risks and addresses the problems that the rule is intended to address.

For further information see the ***state*** fiscal estimate, which will be printed as an appendix to this bill.
