

## 2013 SENATE JOINT RESOLUTION 29

May 6, 2013 – Introduced by Senators DARLING, LAZICH, LEHMAN, MOULTON, OLSEN and L. TAYLOR, cosponsored by Representatives WEATHERSTON, BERCEAU, BERNIER, BIES, ENDSLEY, JORGENSEN, KERKMAN, KLEEFISCH, KNODL, KOLSTE, MARKLEIN, MURTHA, OHNSTAD, A. OTT, PETRYK, SCHRAA, SPIROS, C. TAYLOR, TITTL, WACHS and WILLIAMS. Referred to Committee on Senate Organization.

1     **Relating to:** proclaiming May 22, 2013, as Pediatric Stroke Awareness Day.

2             Whereas, a stroke, also known as a “cerebrovascular accident,” is an acute  
3     neurological injury that occurs when the blood supply to a part of the brain is  
4     interrupted by a clot in the artery or a bursting of the artery; and

5             Whereas, a stroke is a medical emergency that can cause permanent  
6     neurological damage or even death if not promptly diagnosed and treated; and

7             Whereas, the risk of stroke in children is greatest in the first year of life,  
8     particularly in the first month of life, when neonatal stroke occurs in about one of  
9     every 4,000 live births; and

10            Whereas, a baby can have a stroke before birth; and

11            Whereas, nearly 11 out of every 100,000 children have a stroke each year; and

12            Whereas, stroke is among the top ten causes of death for children in the United  
13     States; and

14            Whereas, up to 25 percent of all children who experience a stroke die as a result;

15     and

1           Whereas, stroke recurs in 20 percent of children who have experienced a prior  
2 stroke; and

3           Whereas, the death rate for children who experience a stroke before the age of  
4 one year is the highest out of all age groups; and

5           Whereas, more than half of children who experience a stroke will suffer serious,  
6 long-term neurological disabilities, including hemiplegia, which is paralysis of one  
7 side of the body; seizures; speech and vision problems; and learning difficulties; and

8           Whereas, those disabilities may require lifelong physical, occupational, and  
9 speech therapies, and surgeries; and

10           Whereas, the permanent health concerns and treatments resulting from  
11 strokes that occur during childhood and young adulthood have a considerable impact  
12 on children, families, and society; and

13           Whereas, very little is known about the cause, treatment, and prevention of  
14 pediatric stroke; and

15           Whereas, medical research is the only means by which the citizens of the United  
16 States can identify and develop effective treatment and prevention strategies for  
17 childhood stroke; and

18           Whereas, early diagnosis and treatment of pediatric stroke greatly improves  
19 the chances that the affected child will recover and not experience a recurrence; now,  
20 therefore, be it

21           ***Resolved by the senate, the assembly concurring, That*** the legislature  
22 designates May 22, 2013, as “Pediatric Stroke Awareness Day” and urges the people  
23 of Wisconsin to support the efforts, programs, services, and advocacy of

1 organizations that work to enhance public and clinical awareness of prenatal,  
2 neonatal, and childhood stroke.
