314.05 Homestead, how assigned. When the person who is entitled to the homestead or exempt homestead of which the decedent died seized and the creditors or other persons in interest are unable to agree as to the boundaries thereof, the homestead or exempt homestead may be assigned by the court upon petition. The petition shall describe the lands from which the petitioner asks to have the homestead assigned and allege the facts upon which the petitioner relies. Notice of the proceedings shall be given as provided by section 324.18 and costs shall be awarded as the court shall order. The heirs of any deceased person who, if living, might exercise the right of selecting a homestead, may exercise the right, and if they are minors or under other disability such right may be exercised for them by their guardian or by the court in such manner as will be most beneficial for them.

314.06 Annuity table. The present value of any estate, annuity or interest of beneficiary may be computed on the basis of the American Experience Table of Mortality with Craig's Extension below age ten, and interest at five per cent per annum. The Northampton Table of Mortality and interest at the aforesaid rate may be used where it is impracticable to use the aforesaid basis. Any court or judge by whom any such present value is to be determined may transmit to the commissioner of insurance such statement of the facts as he may require, and said commissioner shall thereupon make the necessary computation and certify same without charge. The present value of an immediate annuity of one dollar, on the above basis for a single life is as follows:

Note: Rule for calculating the present value of a life estate: "Present value" at the head of the above table means that the numbers below that head give the present value of a life annuity of one dollar. Calculate the interest at five per cent for one year upon the sum to the income of which the person is entitled. Multiply this interest by the present value set opposite the person's age in the above table, and the product will be the present value of the life estate of such person in said sum.

314.07 Life estates and annuities; present value. Whenever a person is entitled to the annual interest or income of any sum paid into the court and invested, such party shall be charged with the expense of investing such sum and of receiving and paying over the interest or income thereof. In every case where a person is entitled to and consents to accept a gross sum in lieu of annual interest or income for life, the same shall be estimated in the manner provided by section 314.06.

AMERICAN EXPERIENCE TABLE OF MORTALITY.

Table with 4 columns: Age, Expectation, Age, Expectation, Age, Expectation. It lists life expectancy values for ages 10 through 95 in three columns.

Note: The above table is from Wolfe's Inheritance Tax Calculations. A person of any age specified in the first column has an expectancy of continued life thereafter for the number of years set opposite in the second column.

A court may take judicial notice of figures based on life expectancies computed on the basis of current statistics and published by responsible government agencies, and include such expectancies in instructions to the jury in a person-injury action involving deaths, although such figures may show different life expectancies at particular ages than those shown by the American Experience Table of Mortality.
