*34 Years of Entertainment 1962-1996
"Sinbad's Arabian Adventure"*

**THE MOST ORIGINAL
ACT!**

“Sinbad’s Arabian Adventure”

Take a trip back in time, to the days of Sinbad, the legendary prince and voyager of the high seas, as he embarks on his last and possibly greatest adventure, proving his worth for the love of Princess Parisa.

Parisa’s father Sultan knowing Sinbad’s roaming reputation tries desperately to persuade Parisa to find another suitor. Unable to convince her, he seeks to eliminate Sinbad, eventually sending him in dangerous pursuit of the spark of the serpent’s spitsfire.

Will Sinbad overcome the obstacles placed before him, and win the hand of the lovely Parisa? Or will his final voyage, end their hopes of living happily ever after?

Join the Ski Cats as we present the enchanting tale of Sinbad and his Arabian Adventure.

CRIVITZ SKI CATS

1996 SHOW SCHEDULE

*Performances every Wednesday 6:00 pm
and Saturday 3:00 pm evening
At Lake Noquebay Resort*

~ INTERESTING FACTS ~ About the 1996 Ski Cats Water Ski Team

WATER SKI JUMPS:

The Ski Team has two ski jumps. The jump at the lake is made of wood construction with a wood surface 24 feet long and 14 feet wide. The top of the jump is 6 feet above the surface of the water. The second jump is made of aluminum and is designed to be portable and is used for all away ski shows. Both edges of this jump fold allowing sides 8 foot width for highway travel. The matching sides are attached at each away site and jump platform is raised to the ski foot height. Both of these jumps have been designed for free style water ski jumping.

TOTAL LENGTH OF SKI ROPES:

It takes over 3 miles of ski rope for each show. Every act on the water has it's own set of ropes and each one has to be rolled up after every act without a twisted loop! That's over 15,000 feet of rope folks!

HOURS OF PRACTICE:

Team members begin their practice in February using gym and indoor pools. They hit the water in early May and are ready to begin the season by the first of June.

HEIGHT OF FOUR TIER PYRAMID:

The fifteen skiers in this act build up to a height of 23 feet including the lady at the top of the pyramid. Why, even her feet are 18 feet above the surface of the water.

NUMBER OF SKIERS IN THE BALLET LINE:

The more the merrier! Try counting...12...13...14...15, yes 16 lady ballet skiers.

SPEED FOR BAREFOOT ACTS:

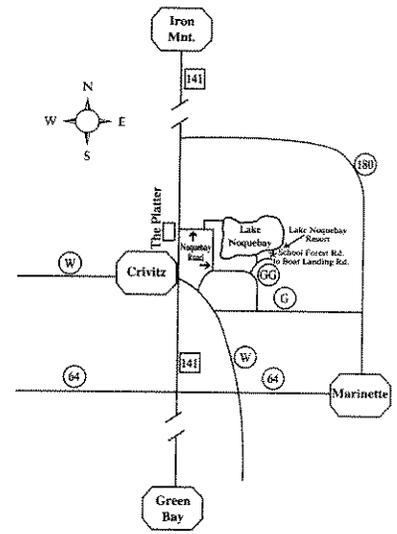

The boat speed is between 40 to 45 miles per hour depending on the skiers, their size and instructions to the driver.

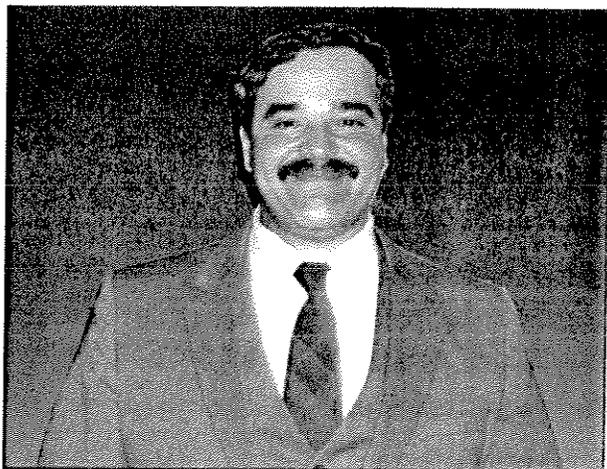

NUMBERS OF TRUCKS TO MOVE SKIERS & EQUIPMENT TO AN AWAY SHOW:

When the Ski Cat's water ski team takes to the road it takes 10 pickup trucks to haul all of the boats, jumps, equipment trailers and portable starting platform. Every member and/or parent pays for their own gas, motel and other expenses.

A SPECIAL THANK-YOU:

A special thank you goes out to all of our families and friends for their help and support. The Ski Cats greatly appreciate it!

President, Jeff Mursau

A WORD FROM OUR PRESIDENT:

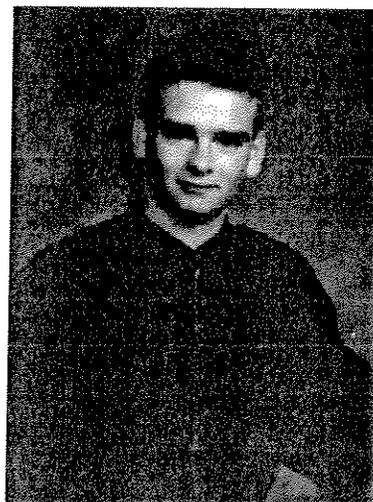

Hello everyone and welcome to our 1996 show. Ski Cat members range from 4 years of age to 60! We are proud of all of their abilities and talents that make our show possible. Winding ropes, costumes, popping popcorn, props, music, this booklet and skiing are many of the responsibilities that make our Water Ski Show a success!

In the next hour, you will see skiing at its best. Our members put their hearts out to you, to bring you the best family entertainment in the area. Sit back and enjoy the next fun filled hour of exciting skiing and boat driving. Thank you for sharing your evening with us and please come again!

In memory of Billie Peters

Billie retired up here in 1975, being a take charge individual. Billie and her sister Joy became active in The Crivitz Ski Cat's behind the scenes activities for the following 8 years. She sewed costumes and ran the concession stand, to help put one of the greatest non-profit organizations on the map. She truly enjoyed helping and working with such dedicated people.

We dedicate this years booklet to Chris Woods. Chris was a member of our club for many years. He was taken from us this past year in a car accident.

ABOUT THE BOATS

The Crivitz Ski Cats currently use 3 tow boats, and a pontoon boat in the performance of their water ski shows. Our club uses Mercury motors exclusively on all our water craft. We have found their performance to be exceptional. We believe the engineering and design of the Mercury motors that we use to be superior to other outboards.

The club presently uses two twinrigged 19 ft. Hydrodynes. These boats are specially rigged and equipped to handle the awesome power of the huge twin Mercury motors. Tow I is equipped with twin 175 H.P. Mercury engines. Tow II is identical to Tow I and is powered by twin 150 H.P. Mercury engines.

Our third club boat, Tow III, is a single rigged 18 ft. Hydrodyne powered by a 175 H.P. Mercury.

Our pick-up boats are 16 feet in length and are specially equipped for their purpose of emergency aid to fallen or injured skiers. One of our Pick-up Boat has a 70 H.P. Mercury on it.

Our pontoon boat is powered by a 55 H.P. Mercury. It is used as a floating, moveable take-off dock to give our club mor flexibility in pulling acts through our show course in a more coordinated fashion to speed up the flow of our show.

Boat Drivers / Observers: Bob Kaas, Gary Langer, Kay Langer, Tom Matykowski, Jeff Mursau, Bunny Peplinski, Jack Scheels, Jackie Scheels, Aaron Sikowski, Julie Smith, Nick Witt, Steven Weiting

Water Skiing Safety Reminders

Nearly 17,000,000 Americans water ski each year. According to all available statistics on water ski accidents, less than 3/1000ths of one percent of these skiers are ever injured in a water skiing-related accident during a season. It is important to know, however, this excellent safety record for the sport exists because boaters and skiers are safely conscious at all times. The following basic safety rules should be thoroughly understood by you and the person who will be towing you on the water. Learning them will help insure that you enjoy water skiing.

For the skier

- Learn to water ski by taking instructions from a qualified teacher.
- Know the proper water ski signals and use them.
- Hold up a ski after a fall if other boats are operating nearby.
- Know your driver and his ability and agree in advance on signals, desired speed and the general path of the boat.

For the driver

- Use a rear-view mirror; take along an observer who can watch the skier constantly while you concentrate your attention on what's happening ahead and around you. Be always aware of the skier behind the boat.
- Keep your boat clear of others - swimmers, fishermen, other boats, other skiers.
- Shut off the engine before the skier proceeds to get into the boat.
- When a skier falls, return immediately for the skier - then pick up any equipment in the water

These few suggestions can help you ski more safely. For more information, contact the American Water Ski Association, P.O. Box 191, Winter Haven, FL 33882, and request the free booklet, "The AWSA Guide to Safe Water Skiing."

Water Skier Hand Signals

1. **Thumb Up:** Speed up the boat.
2. **Thumb Down:** Slow down the boat.
3. **Cut Motor/Stop:** Immediately stop boat. Slashing motion over neck (also used by driver or observer).
4. **Turn:** Turn the boat (also used by driver). Circle motion - arms over head. Then point in desired direction.
5. **Return to Dock:** Pat on the head.
6. **OK:** Speed and boat path OK. Or, signals understood.
7. **I'm OK:** Skier OK after falling.

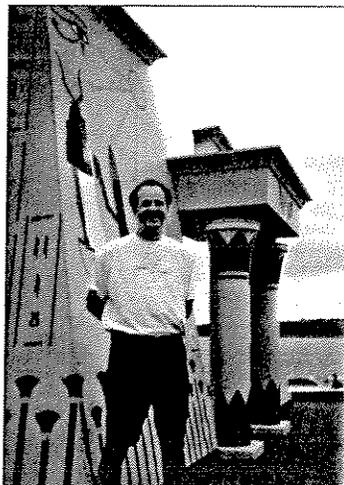

Sara Banaszak, Bob Berndt, Sandy VanCalster,
Lauric Brault, Jillian Langer, and Allison Smith

NOTE!

NEW PFD (LIFE JACKET) REQUIREMENTS

Effective May 1, 1995, the United States Coast guard has changed the law for PFD requirements on boats under 16' and non-motorized boats.

1. All boats will be required to have one wearable PFD for each person on board except as noted in #3 below. (Law does not require the PFD to be worn.)
2. All boats over 16' EXCEPT canoes and kayaks will continue to be required to carry one Type IV throwable in addition to the #1 requirements.
3. Racing shells, rowing sculls, and racing kayaks participating in sanctioned racing events are exempted from carriage of any type of PFD

Ski Jumping

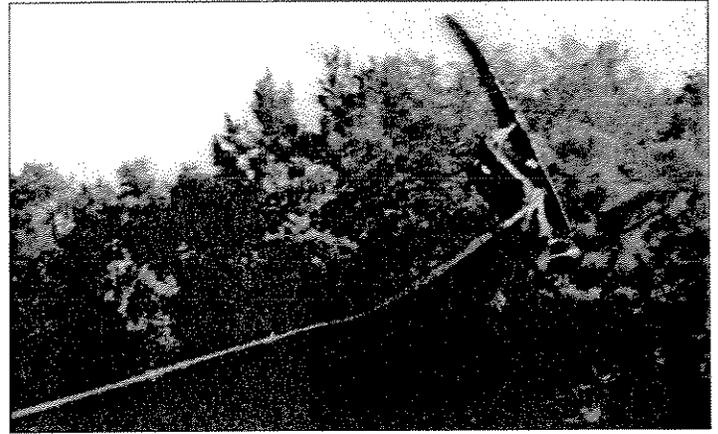

An official water ski jump is 14 feet wide and approximately 25 feet long. The jump height may vary between 5 and 6 feet depending on the event. Jump skis have to be special made to withstand terrific impact when a jumper hits the water. The ability of a water ski jumper is measured by the distance attained in tournament jumping or by the difficulty of the jump in free-styling jumping events.

Trick, or Freestyle Jumping is featured in many water ski shows. Maneuvers may include helicopter spins off the jump, front or back flips (back flips are known as a gainers). It takes a lot of training and courage to attempt and succeed in these maneuvers.

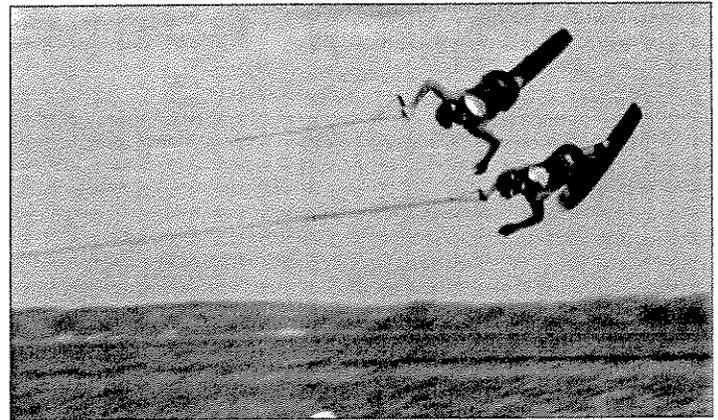

Aluminum honey comb core laminated between graphite and fiberglass. Between 178 and 191 centimeters (70 to 75 inches) in length.

Today's jump team uses full floatation wet suits padded helmets and waxed jump surface to perform helicopters, front and back flips and all sort of variations when watching the jump team perform, keep in mind the history, technology and preparation that goes in each jump and pay close attention to boat drivers they can be amazing.

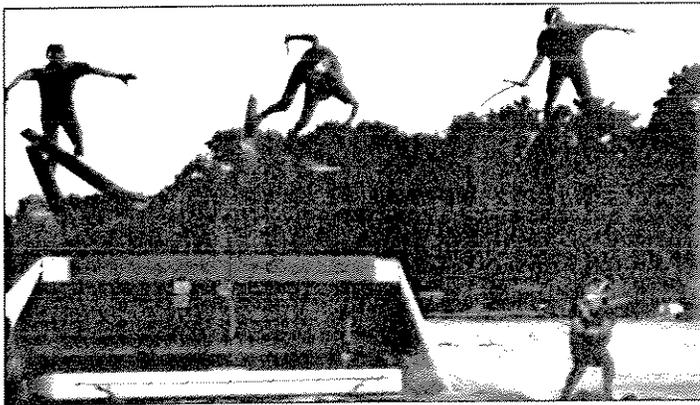

Names of jumpers ~ Scott Banaszak, Jason Gruszynski, Troy Gruszynski, John Jossie Jake Scheels, Chris Mursau, and Tim Mursau.

Swivel Skiing

Swivel skis are eight inches wide and a little shorter than a 68 inch board. Swivel speed is around 14 miles per hour. A skier usually begins by learning to turns, then progressing to 180 degree turns and eventually going on to 360 degree turns.
