24 deposit in the fund. In each year after 2002, each utility shall contribute the entire  
25 amount determined under sub. (2) to the commission for deposit in the fund. The

1 commission shall ensure in rate-making orders that a utility recovers from its  
2 ratepayers the amounts spent on programs or contributed to the fund under this  
3 subsection. The commission shall allow each utility the option of continuing to use,  
4 until January 1, 2002, the moneys that it has recovered under s. 196.374 (3), 1997

11 renewable resource programs by an amount that is greater than the portion of the  
12 public benefits fee specified in s. 16.957 (4) (c) 2., the commission shall reduce the  
13 amount that utilities are required to spend on programs or contribute to the fund  
14 under sub. (3) by the portion of the reduction that exceeds the amount of public  
15 benefits fees specified in s. 16.957 (4) (c) 2.

16 **SECTION 2334t.** 196.378 of the statutes is created to read:

17 **196.378 Renewable resources. (1) DEFINITIONS.** In this section:

18 (a) “Biomass” means a resource that derives energy from wood or plant  
19 material or residue, biological waste, crops grown for use as a resource or landfill  
20 gases. “Biomass” does not include garbage, as defined in s. 289.01 (9), or  
21 nonvegetation-based industrial, commercial or household waste, except that  
22 “biomass” includes refuse-derived fuel used for a renewable facility that was in  
23 service in this state before January 1, 1998.

24 (am) “Biomass cofired facility” means a renewable facility in which biomass  
25 and conventional resources are fired together.

1 (b) “Conventional resource” means a resource that derives energy from coal, oil,  
2 nuclear power or natural gas, except for natural gas used in a fuel cell.

3 (bm) “Department” means the department of administration.

4 (c) “Electric provider” means an electric utility or retail electric cooperative.

5 (d) “Electric utility” means a public utility that sells electricity at retail. For  
6 purposes of this paragraph, a public utility is not considered to sell electricity at  
7 retail solely on the basis of its ownership or operation of a retail electric distribution  
8 system.

9 (e) “Excludable renewable energy” means the portion of an electric provider’s  
10 total renewable energy that is supplied from renewable facilities that were placed  
11 in service before January 1, 1998, and that, before January 1, 1998, derived  
12 electricity from hydroelectric power, even if the output of the renewable facilities is  
13 used to satisfy requirements under federal law.

14 (f) “Nonsystem renewable energy” means the amount of electricity that an  
15 electric provider sells to its retail customers or members and that is supplied or  
16 allocated under executed wholesale purchase contracts from renewable facilities  
17 that are not owned or operated by the electric provider. “Nonsystem renewable  
18 energy” does not include any electricity that is not used to satisfy the electric  
19 provider’s retail load obligations.

20 (g) “Renewable facility” means an installed and operational electric generating  
21 facility in which electricity is derived from a renewable resource. “Renewable  
22 facility” includes a facility the installation or operation of which is required under  
23 federal law, but does not include a facility the installation or operation of which is  
24 required under the laws of another state even if the installation or operation of the  
25 facility is also required under federal law.

1 (h) “Renewable resource” means any of the following:

2 1. A resource that derives electricity from any of the following:

5 c. Solar thermal electric or photovoltaic energy.

6 d. Wind power.

7 e. Geothermal technology.

8 g. Biomass.

9 1m. A resource with a capacity of less than 60 megawatts that derives  
10 electricity from hydroelectric power.

11 2. Any other resource, except a conventional resource, that the commission  
12 designates as a renewable resource in rules promulgated under sub. (4).

13 (i) “Renewable resource credit” means a credit calculated in accordance with  
14 rules promulgated under sub. (3) (a).

15 (j) “Resource” means a source of energy used to generate electric power.

16 (k) “Retail electric cooperative” means a cooperative association organized  
17 under ch. 185 that sells electricity at retail to its members only. For purposes of this  
18 paragraph, a cooperative association is not considered to sell electricity at retail  
19 solely on the basis of its ownership or operation of a retail electric distribution  
20 system.

21 (n) “System renewable energy” means the amount of electricity that an electric  
22 provider sells to its retail customers or members and that is supplied by renewable  
23 facilities owned or operated by the electric provider.

24 (o) “Total renewable energy” means the sum of an electric provider’s system and  
25 nonsystem renewable energy.

1           **(2) RENEWABLE RESOURCE ENERGY.** (a) Each electric provider shall provide to its  
2 retail electric customers or members total renewable energy in at least the following  
3 percentages of its total retail electric sales, either directly or through renewable  
4 resource credits from another electric provider:

- 5           1. By December 31, 2001, 0.5%.
- 6           2. By December 31, 2003, 0.85%.

- 9           5. By December 31, 2009, 1.9%.
- 10          6. By December 31, 2011, 2.2%.

11          (b) For purposes of determining compliance with par. (a):

12           1. Total retail electric sales shall be calculated on the basis of an average of an  
13 electric provider's retail electric sales in this state during the prior 3 years.

14           2. The amount of electricity supplied by a biomass cofired facility that may be  
15 counted toward satisfying the requirements of par. (a) shall be an amount equal to  
16 the product of the maximum amount of electricity that the facility is capable of  
17 generating and the ratio of the energy content of the biomass fuels to the energy  
18 content of both the biomass and conventional resources.

19           3. Any excludable renewable energy that exceeds 0.6% of an electric provider's  
20 total retail electric sales shall be excluded from the electric provider's total  
21 renewable energy.

22           4. The members of a municipal electric company, as defined in s. 66.073 (3) (d),  
23 may aggregate and allocate renewable energy among themselves.

24          (c) No later than April 15 annually, an electric provider shall submit a report  
25 to the department that describes the electric provider's compliance with par. (a).

1 Reports under this paragraph may include certifications from wholesale suppliers  
2 regarding the sources and amounts of energy supplied to an electric provider. The  
3 department may specify the documentation that is required to be included with  
4 reports submitted under this paragraph.

5 (d) The commission shall allow an electric utility to recover from ratepayers the  
6 cost of providing total renewable energy to its retail customers in amounts that equal  
7 or exceed the percentages specified in par. (a). Subject to any approval of the  
8 commission that is necessary, an electric utility may recover costs under this  
9 paragraph by any of the following methods:

10 1. Allocating the costs equally to all customers on a kilowatt-hour basis.

11 2. Establishing alternative price structures, including price structures under  
12 which customers pay a premium for renewable energy.

13 3. Any combination of the methods specified in subds. 1. and 2.

14 (e) 1. This subsection does not apply to any of the following:

15 a. An electric provider that provides more than 10% of its summer peak demand  
16 in this state from renewable facilities.

17 b. An electric provider that provides more than 10% of its summer peak demand  
18 from renewable resources.

19 2. For purposes of calculating the percentages under subd. 1., an electric  
20 provider may include renewable facilities located in this or another state and  
21 renewable facilities located on its or another electric provider's system.

22 3. Notwithstanding subd. 1., this subsection applies to an electric provider  
23 unless the electric provider provides documentation to the commission that  
24 establishes, to the satisfaction of the commission, that the electric provider satisfies  
25 the requirements under subd. 1. a. or b.

1           **(3) RENEWABLE RESOURCE CREDITS.** (a) An electric provider that provides total  
2 renewable energy to its retail electric customers or members in excess of the  
3 percentages specified in sub. (2) (a) 1. to 6. may, in the applicable year, sell to any  
4 other electric provider a renewable resource credit or a portion of a renewable  
5 resource credit at any negotiated price. Alternatively, an electric provider may use  
6 a renewable resource credit or portion of a renewable resource credit in a subsequent  
7 year to establish compliance with sub. (2) (a). The commission shall promulgate  
8 rules that establish requirements for the use of a renewable resource credit,  
9 including calculating the amount of a renewable resource credit.

10           (b) The commission may promulgate rules that establish requirements and  
11 procedures for a sale under par. (a).

12           **(4) RULES.** The commission may promulgate rules that designate a resource,  
13 except for a conventional resource, as a renewable resource in addition to the  
14 resources specified in sub. (1) (h) 1. and 1m.

15           **(5) PENALTY.** Any person who violates sub. (2) or any wholesale supplier who  
16 provides an electric provider with a false or misleading certification regarding the  
17 sources or amounts of energy supplied to the electric provider shall forfeit not less  
18 than \$5,000 nor more than \$500,000. Forfeitures under this subsection shall be  
19 enforced by action on behalf of the state by the attorney general. A court imposing  
20 a forfeiture under this subsection shall consider all of the following in determining  
21 the amount of the forfeiture:

23 volume of business.

24           (b) The gravity of the violation.

1 (c) Whether a violation of sub. (2) is due to circumstances beyond the violator's  
2 control.”.

10 s. 196.491 (1) (f), in the transmission area or in any other area of the state in which  
11 transmission facilities that have been contributed to the transmission company are  
12 located. This subdivision does not affect the right or duty of an electric utility that  
13 is not located in the transmission area or that has not contributed its transmission  
14 facilities to the transmission company to construct or own transmission facilities.

15 2. Subject to any approval required under state or federal law, purchase or  
16 acquire transmission facilities in addition to the transmission facilities contributed  
17 under sub. (5) (b).

18 (c) *Organization.* The operating agreement, as defined in s. 183.0102 (16), of  
19 a transmission company that is organized as a limited liability company under ch.  
20 183 or the bylaws of a transmission company that is organized as a corporation under  
21 ch. 180 shall provide for each of the following:

22 1. That the transmission company has no less than 5 nor more than 14  
23 managers or directors, except that the operating agreement or bylaws may allow the  
24 requirements of this subdivision to be modified upon a unanimous vote of the  
25 managers or directors during the 10-year period after the organizational start-up

1 date or upon a two-thirds vote of the board of directors or managers after such  
2 10-year period.

3 2. That at least 4 managers or directors of the transmission company have  
4 staggered 4-year terms, are elected by a majority vote of the voting security holders  
5 and are not directors, employees or independent contractors of a person engaged in  
6 the production, sale, marketing, transmission or distribution of electricity or natural  
7 gas or of an affiliate of such a person.

8 3. That, during the 10-year period after the organizational start-up date, each  
9 of the following is satisfied, subject to the limitation on the number of managers or  
10 directors under subd. 1.:

11 a. Each nontransmission utility security holder that owns 10% or more of the  
12 outstanding voting securities of the transmission company may appoint one  
13 manager or director of the transmission company for a one-year term, except that  
14 the requirements of this subd. 3. a. may be modified upon a unanimous vote of the  
15 managers or directors.

16 b. Each group of nontransmission utility security holders that, as a group, owns  
17 10% or more of the outstanding voting securities of the transmission company may  
18 appoint one manager or director of the transmission company for a one-year term  
19 if the group has entered into a written agreement regarding the appointment and the  
20 group files the agreement with the transmission company, except that the  
21 requirements of this subd. 3. b. may be modified upon a unanimous vote of the  
22 managers or directors.

23 bg. Each nontransmission utility security holder that makes an appointment  
24 under subd. 3. a. is not allowed to make an appointment under subd. 3. b. as a  
25 member of a group of nontransmission utility security holders.

1           br. Each nontransmission utility security holder that makes an appointment  
2 as a member of a group under subd. 3. b. is not allowed to make an appointment  
3 under subd. 3. a.

4           c. Each person that receives at least 5% of the voting securities of the  
5 transmission company under sub. (6) (a) 1. or 3. may appoint one manager or director  
6 of the transmission company for a one-year term if the person continues to hold at  
7 least a 5% equity interest in the transmission company during the one-year term  
8 and if the person does not make an appointment under subd. 3. a., b. or d.

9           d. Each transmission utility security holder may appoint one manager or  
10 director of the transmission company for a one-year term.

11           4. That, during the 5-year period after the organizational start-up date, no  
12 public utility affiliate that contributes transmission facility assets to the  
13 transmission company under sub. (5) (b) and no affiliate of such a public utility  
14 affiliate may increase its percentage share of the outstanding securities of the  
15 transmission company prior to any initial issuance of securities by the transmission  
16 company to any 3rd party other than a 3rd party exercising its right to purchase  
17 securities under sub. (6) (a) 3., except that this subdivision does not apply to  
18 securities that are issued by the transmission company in exchange for transmission  
19 facilities that are contributed in addition to the transmission facilities that are  
20 contributed under sub. (5) (b) and except that the requirements of this subdivision  
21 may be modified upon a unanimous vote of the managers or directors.

22           5. That, beginning 3 years after the organizational start-up date, any holder  
23 of 10% or more of the securities of the transmission company may require the  
24 transmission company to comply with any state or federal law that is necessary for  
25 the security holder to sell or transfer its shares.

1 (d) *Commission jurisdiction.* The transmission company is subject to the  
2 jurisdiction of the commission except to the extent that it is subject to the exclusive  
3 jurisdiction of the federal energy regulatory commission.

4 **SECTION 2335ud.** 196.485 (4) (a) (intro.) of the statutes is amended to read:

5 196.485 (4) (a) (intro.) ~~A Except as provided in par. (am), a~~ transmission utility  
6 may not transfer control over, or divest its interest in, its transmission facilities to  
7 an independent system operator or independent transmission owner unless, to the  
8 satisfaction of the commission, each of the following requirements is satisfied:

9 **SECTION 2335uf.** 196.485 (4) (am) of the statutes is created to read:

10 196.485 (4) (am) Each transmission utility in the transmission area that is a  
11 public utility shall become a member of the Midwest independent system operator  
12 no later than June 30, 2000, and shall transfer operational control over its  
13 transmission facilities to the Midwest independent system operator. Each such  
14 transmission utility that has not contributed its transmission facilities to the  
15 transmission company shall elect to become part of the single zone for pricing  
16 purposes within the Midwest independent system operator and any phase-in plan  
17 prepared under sub. (3m) (a) 4.

18 **SECTION 2335uh.** 196.485 (5) of the statutes is created to read:

19 196.485 (5) PUBLIC UTILITY AFFILIATES. (a) *Asset cap exception.* Section 196.795  
20 (6m) (e) does not apply to the eligible assets of a nonutility affiliate in a holding  
21 company system unless each public utility affiliate in the holding company system  
22 does each of the following:

23 1. Petitions the commission and the federal energy regulatory commission to  
24 approve the transfer of operational control of all the public utility affiliate's

1 transmission facilities in this state and in Iowa, Michigan, Minnesota and Illinois to  
2 the Midwest independent system operator.

3 2. Files with the commission an unconditional, irrevocable and binding  
4 commitment to contribute, no later than September 30, 2000, all of the transmission  
5 facilities that the public utility affiliate owns or operates in this state on the effective  
6 date of this subdivision .... [revisor inserts date], and land rights, to the transmission  
7 company. A filing under this subdivision shall specify a date no later than September  
8 30, 2000, on which the public utility affiliate will complete the contribution of  
9 transmission facilities.

10 3. Files with the commission an unconditional, irrevocable and binding  
11 commitment to contribute, and to cause each entity into which it merges or  
12 consolidates or to which it transfers substantially all of its assets to contribute, any  
13 transmission facility in this state the ownership or control of which it acquires after  
14 the effective date of this subdivision .... [revisor inserts date], and land rights, to the  
15 transmission company.

16 4. Notifies the commission in writing that the public utility affiliate has become  
17 a member of the Midwest independent system operator, has agreed to transfer its  
18 transmission facilities to the Midwest independent system operator and has  
19 committed not to withdraw its membership prior to the date on which the public  
20 utility affiliate contributes transmission facilities to the transmission company  
21 under par. (b).

22 5. Petitions the commission and the federal energy regulatory commission to  
23 approve the contributions specified in subds. 2. and 3. and agrees in such a petition  
24 not to withdraw the petition in the event that the commission or the federal energy

1 regulatory commission conditions its approval on changes that are consistent with  
2 state and federal law.

3 (b) *Contribution of transmission facilities.* 1. A public utility affiliate may not  
4 contribute a transmission facility to the transmission company until the commission  
5 has reviewed the terms and conditions of the transfer to determine whether the  
6 transfer satisfies the requirements of this subsection and has issued an order  
7 approving the terms and conditions of the transfer. The commission may modify the  
8 terms and conditions of the transfer and take any other action necessary to satisfy  
9 the requirements of this subsection. An order under this subdivision that approves  
10 or modifies the terms and conditions of a transfer may allow a public utility affiliate  
11 to recover in retail rates any adverse tax consequences of the transfer as a transition  
12 cost.

13 2. The transmission company and a public utility affiliate that files a  
14 commitment to contribute transmission facilities under par. (a) 2. shall structure the  
15 transfer of the transmission facilities in a manner that satisfies each of the following:

16 a. The structure of the transfer avoids or minimizes material adverse tax  
17 consequences to the public utility affiliate from the transfer and avoids or minimizes  
18 material adverse consequences on public utility rates that do not arise out of  
19 combining the transmission company's facilities into a single zone in the Midwest  
20 independent system operator.

21 b. To the extent practicable, the structure of the transfer satisfies the  
22 requirements of the Internal Revenue Service for a tax-free transfer.

23 3. The requirements under subd. 2. b. shall, if practicable, be satisfied by the  
24 transmission company's issuance of a preferred class of securities that provides the  
25 fixed-cost portion of the resulting capital structure of the transmission company.

1 The transmission company shall issue preferred securities under this subdivision on  
2 a basis that does not dilute the voting rights of the initial security holders relative  
3 to the value of their initial contributions.

4 4. If the transfer of transmission assets under this paragraph results in a  
5 capital structure of the transmission company in which the percentage of common  
6 equity is materially higher than that of the public utility affiliates who made the  
7 transfer, or if the cost of the fixed-cost portion of the capital structure of the  
8 transmission company is materially higher than that of the public utility affiliates  
9 who made the transfer, the public utility affiliates shall enter into a contract with the  
10 transmission company under which the public utility affiliates agree to accept from  
11 the transmission company a return on common equity based upon the equity rate of  
12 return approved by the federal energy regulatory commission and upon an imputed  
13 capital structure that assigns to a portion of the public utility affiliates' common  
14 equity holdings an imputed debt return that is consistent with the requirements of  
15 this subdivision. A contract under this subdivision shall specify that the public  
16 utility affiliates shall be required to accept the return on common equity described  
17 in this subdivision only until such time that the federal energy regulatory  
18 commission determines that the actual capital structure and capital costs of the  
19 transmission company are appropriate and consistent with industry practice for a  
20 regulated public utility that provides electric transmission service in interstate  
21 commerce.

22 5. If, at the time that a public utility affiliate files a commitment under par. (a)  
23 2., the public utility affiliate has applied for or obtained a certificate of public  
24 convenience and necessity under s. 196.491 (3) or a certificate under s. 196.49 for the

1 construction of transmission facilities, the public utility affiliate shall do each of the  
2 following:

3 a. Proceed with diligence with respect to obtaining the certificate and, except  
4 as provided in subd. 6., constructing the transmission facilities.

5 b. If the commission determines that the cost of the transmission facilities is  
6 reasonable and prudent, transfer the transmission facilities to the transmission  
7 company at net book value when construction is completed in exchange for additional  
8 securities of the transmission company on a basis that is consistent with the  
9 securities that were initially issued to the public utility affiliate.

10 6. If the construction of a transmission facility specified in subd. 5. a. is not  
11 completed within 3 years after a certificate is issued for the transmission facility  
12 under s. 196.49 or 196.491 (3), the transmission company may assume responsibility  
13 for completing construction of the transmission facility. If the transmission company  
14 assumes responsibility for completing construction under this subdivision, the  
15 transmission company shall carry out any obligation under any contract entered into  
16 by the public utility with respect to the construction until the contract is modified or  
17 rescinded by the transmission company to the extent allowed under the contract.

18 7. Any transmission facilities that are contributed to the transmission  
19 company shall be valued at net book value determined on the basis of the regulated  
20 books of account at the time of the transfer.

21 (bm) *Lease of transmission facilities.* If a public utility affiliate is not able to  
22 contribute its transmission facilities to the transmission company as required under  
23 par. (b) due to merger-related accounting requirements, the public utility affiliate  
24 shall transfer the transmission facilities to the transmission company under a lease  
25 for the period of time during which the accounting requirements are in effect and,

1 after such requirements are no longer in effect, contribute the transmission facilities  
2 to the transmission company under par. (b). A public utility affiliate that transfers  
3 transmission facilities under a lease under this paragraph does not qualify for the  
4 asset cap exception under par. (a) unless, during the term of the lease, the public  
5 utility affiliate does not receive any voting interest in the transmission company.

6 (c) *Contribution of land rights.* 1. A public utility affiliate that commits to  
7 contributing land rights to the transmission company under par. (a) 2. shall do each  
8 of the following:

9 a. Except as provided in subd. 2., if the land right is assigned to a transmission  
10 account for rate-making purposes and is not jointly used for electric and gas  
11 distribution facilities by the public utility affiliate, the public utility affiliate shall  
12 convey or assign at book value all of its interest in the land right to the transmission  
13 company, except that any conveyance or assignment under this subd. 1. a. shall be  
14 subject to the rights of any joint user of the land right and to the right of the public  
15 utility affiliate to nondiscriminatory access to the real estate that is subject to the  
16 land right.

17 b. If the land right is jointly used, or is intended to be jointly used, for electric  
18 and gas distribution facilities by the public utility affiliate, the public utility affiliate  
19 shall enter into a contract with the transmission company that grants the  
20 transmission company a right to place, maintain, modify or replace the transmission  
21 company's transmission facilities on the real property that is subject to the land right  
22 during the life of the transmission facilities and the life of any replacements of the  
23 transmission facilities. A right granted in a contract under this subd. 1. b. shall be  
24 paramount to the right of any other user of the land right, except that a right granted

1 in such a contract shall be on par with the right of the public utility affiliate to use  
2 the land right for electric or gas distribution facilities.

3 2. If a public utility affiliate is prohibited from making a conveyance or  
4 assignment described in subd. 1. a., the public utility affiliate shall enter into a  
5 contract with the transmission company that grants the transmission company  
6 substantially the same rights as under such a conveyance or assignment. For  
7 purposes of a contract under this subdivision, a land right shall be valued at book  
8 value, not at market value.

9 3. The commission shall resolve any dispute over the contribution of a land  
10 right under subd. 1. or 2., including a dispute over the valuation of such a land right,  
11 unless a federal agency exercises jurisdiction over the dispute. During the pendency  
12 of any dispute that is before the commission or a federal agency, the transmission  
13 company shall be entitled to use the land right that is the subject to the dispute and  
14 shall be required to pay any compensation that is in dispute into an escrow account.

15 (d) *Applicability.* Notwithstanding sub. (1) (h), and subject to any approval  
16 required under federal law, for purposes of this subsection, a facility of a public utility  
17 affiliate is a transmission facility if any of the following applies:

18 1. The facility is not a radial facility and the facility is designed for operation  
19 at a nominal voltage of more than 130 kilovolts.

20 2. The facility is not a radial facility and the facility is designed for operation  
21 at a nominal voltage of more than 50 kilovolts but not more than 130 kilovolts, unless  
22 a person has demonstrated to the commission that the facility is not a transmission  
23 facility on the basis of factors for identifying a transmission facility that are specified  
24 in the orders of the federal energy regulatory commission under 16 USC 824d and  
25 824e.

1           3. The facility is a radial facility or is designed for operation at a nominal  
2 voltage of 50 kilovolts or less, and a person has demonstrated to the commission that  
3 the facility is a transmission facility on the basis of factors for identifying a  
4 transmission facility that are specified in the orders of the federal energy regulatory  
5 commission under 16 USC 824d and 824e.

6           **SECTION 2335uj.** 196.485 (6) of the statutes is created to read:

7           196.485 (6) ELECTRIC UTILITIES, TRANSMISSION DEPENDENT UTILITIES AND RETAIL  
8 ELECTRIC COOPERATIVES. (a) No later than the first day of the 12th month beginning  
9 after the first public utility affiliate files a commitment under sub. (5) (a) 2.:

10           1. An electric utility, other than a public utility affiliate or an owner or operator  
11 of a wholesale merchant plant, as defined in s. 196.491 (1) (w), may transfer all of its  
12 transmission facilities that are specified in subd. 2. to the transmission company on  
13 the same terms and conditions as a contribution of transmission facilities and land  
14 rights by a public utility affiliate under sub. (5) (b) and (c).

15           2. An electric utility may transfer transmission facilities under subd. 1. if the  
16 transmission facilities are located in the geographic area that is served by the  
17 Mid–America Interconnected Network, Inc., or the Mid–Continent Area Power Pool  
18 reliability council of the North American Electric Reliability Council.

19           3. A transmission–dependent utility or retail electric cooperative may  
20 purchase equity interests in the transmission company at a price that is equivalent  
21 to net book value and on terms and conditions that are comparable to those for public  
22 utility affiliates that have contributed transmission facilities to the transmission  
23 company. A purchaser under this subdivision may contribute funds to the  
24 transmission company that are no more than the value of its prorated shares based  
25 on firm electric usage in this state in 1999.

1 (b) Notwithstanding sub. (1) (h), and subject to any approval required under  
2 federal law, for purposes of this subsection, a facility of an electric utility is a  
3 transmission facility if the criteria specified in sub. (5) (d) 1., 2. or 3. are satisfied.

4 **SECTION 2335uk.** 196.485 (6m) of the statutes is created to read:

5 196.485 (6m) DIVIDENDS, DISTRIBUTIONS, PROFITS AND GAINS. The commission  
6 may not treat any dividend or distribution received by a transmission utility from  
7 the transmission company or any gain or profit of a transmission utility from the sale  
8 or other disposition of securities issued by the transmission company as a credit  
9 against the retail revenue requirements of the transmission utility.

10 **SECTION 2335um.** 196.485 (7) of the statutes is created to read:

11 196.485 (7) ENFORCEMENT. A wholesale or retail customer of a public utility  
12 affiliate may petition the circuit court for Dane County for specific performance of  
13 a commitment filed under sub. (5) (a) 2. or 3.

14 **SECTION 2335uo.** 196.485 (8) of the statutes is created to read:

15 196.485 (8) PENALTIES. A public utility affiliate that fails to complete the  
16 contribution of transmission facilities to the transmission company by the  
17 completion date specified in the filing under sub. (5) (a) 2. shall forfeit \$25,000 for  
18 each day that completion of the contribution is delayed if the transmission company  
19 is legally able to accept the contribution.

20 **SECTION 2335uq.** 196.487 of the statutes is created to read:

21 **196.487 Reliability of electric service. (1) DEFINITIONS.** In this section:

22 (a) "Public utility affiliate" has the meaning given in s. 196.795 (1) (L).

23 (b) "Transmission company" has the meaning given in s. 196.485 (1) (ge).

24 (2) COMMISSION ORDER. If the commission determines that a public utility  
25 affiliate or the transmission company is not making investments in the facilities

1 under its control that are sufficient to ensure reliable electric service, the commission  
2 shall order the public utility affiliate or transmission company to make adequate  
3 investments in its facilities that are sufficient to ensure reliable electric service. An  
4 order under this subsection shall require the public utility affiliate or transmission  
5 company to provide security in an amount and form that, to the satisfaction of the  
6 commission, is sufficient to ensure that the public utility affiliate or transmission  
7 company expeditiously makes any investment that is ordered.

8 (3) COST RECOVERY. The commission shall allow a public utility affiliate that is  
9 subject to an order under sub. (2) to recover in its retail electric rates the costs that  
10 are prudently incurred in complying with the order.

11 SECTION 2335wb. 196.491 (3) (d) 3r. of the statutes is created to read:

12 196.491 (3) (d) 3r. For a high-voltage transmission line that is proposed to  
13 increase the transmission import capability into this state, existing rights-of-way  
14 are used to the extent practicable and the routing and design of the high-voltage  
15 transmission line minimizes environmental impacts in a manner that is consistent  
16 with achieving reasonable electric rates.

17 SECTION 2335wd. 196.491 (3) (d) 3t. of the statutes is created to read:

18 196.491 (3) (d) 3t. For a high-voltage transmission line that is designed for  
19 operation at a nominal voltage of 345 kilovolts or more, the high-voltage  
20 transmission line provides usage, service or increased regional reliability benefits to  
21 the wholesale and retail customers or members in this state and the benefits of the  
22 high-voltage transmission line are reasonable in relation to the cost of the  
23 high-voltage transmission line.

24 SECTION 2335wf. 196.491 (3) (gm) of the statutes is created to read:

1           196.491 (3) (gm) The commission may not approve an application filed after the  
2 effective date of this paragraph .... [revisor inserts date], under this section for a  
3 certificate of public convenience and necessity for a high-voltage transmission line  
4 that is designed for operation at a nominal voltage of 345 kilovolts or more unless the  
5 approval includes the condition that the applicant shall pay the fees specified in sub.  
6 (3g) (a). If the commission has approved an application under this section for a  
7 certificate of public convenience and necessity for a high-voltage transmission line  
8 that is designed for operation at a nominal voltage of 345 kilovolts or more that was  
9 filed after April 1, 1999, and before the effective date of this paragraph .... [revisor  
10 inserts date], the commission shall require the applicant to pay the fees specified in  
11 sub. (3g) (a). For any application subject to this paragraph, the commission shall  
12 determine the cost of the high-voltage transmission line, identify the counties,  
13 towns, villages and cities through which the high-voltage transmission line is routed  
14 and allocate the amount of investment associated with the high-voltage  
15 transmission line to each such county, town, village and city.

16           **SECTION 2335wh.** 196.491 (3g) of the statutes is created to read:

17           196.491 (3g) FEES FOR CERTAIN HIGH-VOLTAGE TRANSMISSION LINES. (a) A person  
18 who receives a certificate of public convenience and necessity for a high-voltage  
19 transmission line that is designed for operation at a nominal voltage of 345 kilovolts  
20 or more under sub. (3) shall pay the department of administration an annual impact  
21 fee as specified in the rules promulgated by the department of administration under  
22 s. 16.969 (2) (a) and shall pay the department of administration a one-time  
23 environmental impact fee as specified in the rules promulgated by the department  
24 of administration under s. 16.969 (2) (b).

2 any other mitigation measure that is required in an order by the commission under  
3 sub. (3) regarding the certificate of public convenience and necessity specified in par.  
4 (a).

5 **SECTION 2335wj.** 196.491 (3m) (b) 2. of the statutes is amended to read:

6 196.491 (3m) (b) 2. The analytical process specified in subd. 1. b. shall, to the  
7 extent practicable, be consistent with the analytical process described in the merger  
8 enforcement policy of the federal department of justice and the federal trade  
9 commission regarding horizontal acquisitions and mergers that are subject to 15  
10 USC 1, 18 or 45, as defined in s. 196.485 (1) (dr).

11 **SECTION 2335wL.** 196.494 (3) of the statutes is amended to read:

12 196.494 (3) ~~No later than December 31, 2004, the~~ The commission may shall,  
13 under this subsection, issue an order requiring the transmission company, as defined  
14 in s. 196.485 (1) (ge), or an electric utility to construct or procure, on a competitive  
15 basis, the construction of transmission facilities specified by the commission in its  
16 order if the commission determines that, based on the results of the study under sub.  
17 (2), such construction is necessary to relieve a constraint on a transmission system  
18 and the construction will materially benefit the customers of the transmission  
19 company or electric utility or other electric utilities or of an independent system  
20 operator, as defined in s. 196.485 (1) (d), or independent transmission owner, as  
21 defined in s. 196.485 (1) (dm).

22 **SECTION 2335wn.** 196.494 (5) of the statutes is created to read:

23 196.494 (5) The governor may, on behalf of this state, enter into an interstate  
24 compact that establishes a joint process for the states in the upper midwest region  
25 of the United States to determine the need for and siting of regional electric

1 transmission facilities that may affect electric service in this state. The governor  
2 may not enter into a compact under this subsection unless the compact includes  
3 requirements and procedures for establishing each of the following:

4 (a) Compliance with each state's environmental and siting standards for  
5 transmission facilities.

6 (b) A regional need determination for transmission facilities.

7 (c) A mechanism for resolving conflicts between the states regarding the siting

2 pursuant to a call, issues a state implementation plan that requires electric  
3 generating facilities in the midcontinent area of this state to comply with nitrogen  
4 oxide emission reduction requirements. If the department of natural resources  
5 issues such a plan, the department of natural resources shall notify the department  
6 of administration and the public service commission. The notice shall specify the  
7 date on which electric generating facilities in the midcontinent area of this state are  
8 required to comply with the initial nitrogen oxide emission reduction requirements.

9           (3) NITROGEN OXIDE EMISSIONS STANDARDS AND LIMITATIONS. (a) In establishing  
10 nitrogen oxide emission reduction requirements for the control of atmospheric ozone  
11 in another state pursuant to a call, the department may not, in a state  
12 implementation plan, by rule or through the adoption of control strategies, establish  
13 nitrogen oxide emissions standards or limitations that do any of the following:

2 nitrogen oxide emissions that are in addition to any reductions required in a state  
3 implementation plan from any of the following:

4 1. Any stationary source located in this state that is not an electric generating  
5 facility owned by a public utility or electric cooperative.
