### *Analysis by the Legislative Reference Bureau*

This bill requires every health insurance policy (called "disability insurance policy" in the statutes), including managed care plans, health care plans offered by the state, and every self-insured health plan of the state or a county, city, town, village or school district, to provide coverage of appropriate and necessary immunizations, specified in the bill, from birth to age two, for a dependent child of the insured if the policy or plan covers a dependent of the insured. (Under current law, health insurance policies are required to cover a newly born child of the insured, even if the policy did not provide coverage for dependents at the time of the birth.) Generally, coverage of the specified immunizations may not be subject to any deductibles, coinsurance or copayments under the policy or plan. Specifically excluded from this coverage requirement are health insurance policies that cover only hospital and surgical charges or only certain specified diseases, health care plans offered by limited service health organizations or by preferred provider plans that are not managed care plans, medicare replacement or supplement policies and long-term care insurance policies.
