Assumptions Used in Arriving at Fiscal Estimate

SUMMARY OF BILL - This bill requires the Department to establish and operate a system for registering reductions in emissions of greenhouse gases if the reductions are made before they are required by law. The bill authorizes the Department to register carbon sequestration from the creation or preservation of carbon reserves and to register avoided emissions resulting from energy efficiency measures and from the use of renewable energy sources. The bill also authorizes the Department to establish systems for registering reductions in emissions of fine particulate matter, mercury, and other air contaminants identified by the Department if the reductions are made before they are required by law. The bill requires the Department to promulgate rules to establish these systems.

FISCAL IMPACT - This bill will require one FTE position to develop administrative rules and to establish and operate a system or systems to register greenhouse gas and other air contaminant emission reductions. The FTE cost for this position will be \$50,000 annually.

Long-Range Fiscal Implications

The new FTE will be needed to operate the emission reduction registry system(s) over the long term.
