Assumptions Used in Arriving at Fiscal Estimate		
<p>Act 9 (the biennial budget bill) requires that all receipts from national forest land must be distributed to school districts in accordance with the number of acres located within the school district boundaries. This bill would (before the enactment of Act 9) restore law previous to Act 9 by requiring the distribution of receipts from national forest land to towns in accordance with the number of acres located within the town boundaries.</p> <p>Local Fiscal Effects: In addition, the bill requires the secretary of the Department of Natural Resources to make a one time appropriation of \$1,805,800 GPR to school districts that contain national forest lands within their boundaries. The distribution of funds to each school district must reflect the proportion of national forest acreage located within the school district.</p> <p>While this bill would reimburse school districts for the loss of national forest land revenue for one year, school districts would experience a permanent loss of revenue in future years.</p>
