GPR FED PRO PRS SEG SEG-S

Affected Ch. 20 Appropriations

20.395(5)(cq); 20.395(4)(aq)

Assumptions Used in Arriving at Fiscal Estimate

This bill requires that the color of vehicle be included on the application for vehicle registration and on the certificate of vehicle registration. This requirement applies to all vehicles registered at 8,000 pounds or less, except motorcycles. The department is also required to make a place on the application for registration and registration renewal for the person to indicate if the vehicle color has changed from the color specified on the certificate of registration.

The bill also directs that a person need not notify DMV of a color change before the next registration renewal time, and prohibits a law enforcement officer from stopping a vehicle solely because the vehicle's color differs from that stated in the registration application.

This bill would require several changes to the DMV vehicle registration data processing systems. Included are changes to the titling/registration system and title/registration printing system to include color; and the renewal system and renewal printing system. Also, the DMV "key number" inquiry system, and the law enforcement inquiry system must be modified, to include color. In addition, we would need to create a "mapper" in the dp system, that contains all valid colors and abbreviations, and we would need to modify several reports.

Data processing work would require an estimated 75 staff days at a cost of \$37,500. This one-time cost is necessary before the bill could be implemented. This cost is funded in the bill with a one-time increase of \$37,500 to the DMV appropriation, in FY 2001.
