Analysis of Proposed Rules

Statutory Authority: Sections 101.19 and 145.08, Stats.

Statutes Interpreted: Sections 101.19 and 145.08, Stats.

The Division of Safety and Buildings within the Department of Commerce is responsible for administering and enforcing safety and health rules relating to the construction and inspection of dwellings, public buildings and places of employment. In the administration and enforcement of those rules, the Department provides numerous services such as plan examination, inspection and certification. The Department, by rule promulgated under chapter 227 of the Wisconsin Statutes, is required to fix and collect fees which should, as closely as possible, equal the cost of providing those services.

Most of the fees charged by the Division of Safety and Buildings are contained in chapter Comm 2. Additional fees for licenses, certifications and registrations are contained in chapter Comm 5. The proposed rules consist of increases in most of the fees in chapter Comm 2 and some of the fees in chapter Comm 5.

The majority of the Division's fees in chapter Comm 2 have not been increased since 1992. The proposed changes are necessary in order to bring revenues more in line with the costs of providing the services in each program area. It is estimated that the fee increases will increase total program revenues by 23 percent and provide sufficient revenues for a 4 year period. Under the proposal, each program area will be self-sufficient except for the Public Sector Safety Program which is subsidized 100 percent by the Commercial Building Plan Review and Inspection Program.

The proposed rules contain fee increases ranging from 2 percent to 200 percent. In some program areas the current fee amounts will remain unchanged. Those program area fees that are not being changed include: Manufactured Dwellings, One- and 2-Family Dwellings, Rental Unit Energy Efficiency, Private Sewage System Plan Review, Plumbing Product Review, Sanitary Permits, Swimming Pool Plan Review, Plumbing Licensing, Fire Sprinkler Installer Licensing, HVAC Certification, Refrigerant Handling Certification, Soil Tester Certification, and all Inspector Certifications.

Under the proposed rules, the fees for lighting plan review are combined with the fees for building plan review. Submittal requirements for lighting plans, however, are not being changed.

The proposed rules also contain minor revisions to the requirements for plumbing plan review and plumbing product review. The project threshold for submitting plumbing plans is being raised from 11 to 16 plumbing fixtures. Plumbing product review is being discontinued for cross connection control devices and for water treatment devices listed as complying with the appropriate national standard.

The following is a brief summary by program area of the major fee changes in the proposed rules. The summary is arranged in the same order as chapter Comm 2.

1. Boilers, Pressure Vessels, Anhydrous Ammonia and Mechanical Refrigeration

- Current fee amounts for plan reviews and inspections would generally be increased 35 percent, rounded to \$5 increments.
- Current fee amounts for Permits to Operate would be increased 40 percent.
- Current fee amounts for anhydrous ammonia plan review and initial inspection would be increased 200 percent. This fee is being raised to the same level as the LP gas fee because the piping, pumping and storage systems are very similar for the 2 systems.

2. Elevators and Lifting Devices

- Current fee amounts for plan review and initial inspection in Table 2.15-1 would be increased 100 percent.
- Current fee amounts for periodic inspections in Table 2.15-2 would be increased as follows based on the expected average inspection times shown below and a "billing" rate of \$60 per hour:
 - 0-4 landings - 63 percent increase (1.5 hours)
 - 5-10 landings - 41 percent increase (2.0 hours)
 - 11 or more landings - 30 percent increase (2.5 hours)
 - Escalators - 30 percent increase (2.5 hours)
- The current fee amount for a Permit to Operate would be increased 75 percent.

3. Mines, Pits, Quarries, Explosives and Blasters

- Current annual safety service fee amounts for mine, pit or quarry production in Table 2.17 would be unchanged, and the fee for inspections and monitoring visits would be eliminated.
- A training fee would be created for those persons not paying the safety service fee.
- The remaining current fee amounts in sections Comm 2.17, 2.18 and 2.19 would be increased 45 percent, rounded to \$5 increments.
- Current fee amounts for blaster licenses in Table 5.02 would be increased 50 percent.

4. Amusement Rides

- Current fee amounts for plan examination and inspection would generally be increased 60 percent, rounded to \$5 increments.

5. Tramways, Lifts and Towing Devices

- Current fee amounts for plan review and inspection would be increased 160 percent.
- The current fee amount for a Permit to Operate would be increased 120 percent

6. Buildings, Structures, Heating and Ventilation

- Current fee amounts for separate review of building plans and HVAC plans would be increased 35 percent, generally rounded to \$10 increments. The current "discount" for simultaneous submittal of building plans and HVAC plans would be replaced with a method involving a \$100 plan entry fee to accompany each plan submittal.
- New fees would be created for review of fire alarm system plans and fire suppression system plans. The additional revenue from this new service is projected to be \$100,000 per year, based on an annual workload of 550 plans and average fee of \$182.

7. Mobile Homes

- Current fee amounts for formaldehyde testing and investigation would be increased 20 percent.

8. Liquefied Petroleum Gas, Liquefied Natural Gas and Compressed Natural Gas

- Current fee amounts for plan review and inspection would generally be increased 30 percent.

9. Material Approvals and Petitions for Variance

- Current fee amounts for material reviews would be increased 25 percent.
- Current fee amounts for petitions for variance for public buildings under chapters Comm 50 to 64 and 66 would be increased 2 percent.
- Current fee amounts for petitions for variance for public sector employment under section 101.055, Stats., would be increased 50 percent.
- Current fee amounts for petitions for variance of all other rules not specifically mentioned in section Comm 2.52 would be increased 25 percent.

10. Plat Review and Investigations

- A new fee would be created for lot restriction waivers.

11. Plumbing Systems Plan Review

- Current fee amounts would generally be increased 15 percent, rounded to \$5 increments. Some fee amounts, such as for building storm and clear water drain systems, would be increased 25 percent.

12. Electrician Certification

- Current fee amounts would be increased as follows:
 - Master Electrician Certification - 25 percent increase
 - Journeyman Electrician Certification - 50 percent increase
 - Beginning Electrician Certification - 20 percent increase
