4. Consolidate Appropriations (DIN 8000, 8001, 8002, 8003, 8006, 8008 and 8009)

Explanation:

The department proposes to streamline its appropriation structure by consolidating various appropriations. The proposed consolidations will not change appropriation amounts. The department will still be able to track revenues and expenditures for each component account within each consolidated appropriation, as necessary. The proposed consolidations are as follows:

- The department has several “gifts and grants” appropriations which authorize the department to receive and spend gifts and grants for purposes authorized by law. The department proposes to consolidate these into a single “gifts and grants” appropriation for the entire department. (See DIN 8000.)
- The department has several “principal repayment and interest” appropriations. These are sum sufficient appropriations used to repay bond revenue principal and interest incurred in financing department facilities, or in implementing bond-revenue-funded programs (conservation reserve enhancement and soil and water resource management). The department proposes to consolidate these into a single “principal repayment and interest” appropriation. (See DIN 8001.)
- The department has several appropriations for funds that it receives from other agencies in return for contract services provided to those agencies. The department proposes to consolidate 3 of these into a single contract services appropriation. (See DIN 8002.)
- The department has a GPR appropriation for general marketing operations. In 1999 Wis. Act 9, the Legislature created a separate GPR appropriation for export marketing. The department proposes to consolidate these appropriations. (See DIN 8003.)
- The department has two plant protection appropriations funded from the state Conservation Fund. One is a general appropriation for plant protection, nursery regulation and pest control. The other is for gypsy moth control. The department proposes to consolidate these appropriations. (See DIN 8006).
- The department has a general appropriation for laboratory service fees. The department also has a specific lab service fee appropriation for milk standards. Both of these appropriations are used for fees received from the public. The department proposes to consolidate these appropriations. (See DIN 8008.)

- The department has several administrative appropriations funded from the state Agrichemical Management Fund. The department proposes to consolidate these appropriations. (See DIN 8009.)

This is the draft that consolidates DATCP appropriations. The draft does not transfer unencumbered balances from annual appropriations that are not program revenue appropriations or from sum sufficient appropriations. The balance in an annual appropriation (that is not from program revenue) lapses at the end of the fiscal year. The "transfer" aspect of these annual appropriations is handled in the chapter 20 schedule entry for the remaining appropriation. There is no balance in a sum sufficient appropriation (the amounts in the schedule are only estimates) and it is not necessary to transfer funds into a sum sufficient appropriation because any amount necessary for the appropriation's purposes may be expended from the appropriation.

Please contact me if you have any questions about this.

Hi Becky -- Just a couple comments on DATCP budget drafts received to date:

* -- LRB-0394/1 (consolidating appropriations): On page 6, line 4, we believe that the appropriation should be 20.115(8)(kp) not (2)(kp).

-- LRB-0397/1 (agricultural policy reform): In response to your drafter's note, we would be happy with your suggestions if they are OK with DOA.

We may also be forwarding some minor drafting changes to the Ag Producer Security legislation in the next few days.

Thanks,
Jim Matson
