

I am a student at the University of Wisconsin-Superior. I am very concerned about the statutory language for tuition flexibility in the governor's proposed budget for the 2001-2003 biennium.

The Board of Regents is an un-elected body, and would therefore not be accountable to constituents and voters. Thus the UW System would be privatized and the state's role would only be to subsidize a private institution. This would pave the way for massive tuition hikes which have hit other universities. Without legislative oversight of tuition levels, nothing stands in the way of rapidly increased fees.

The state must adequately fund the UW System and not give the Board of Regents the power to raise tuition without legislative oversight. I am calling on you to remove the statutory language regarding tuition flexibility from the 2001-2003 biennial budget.

Thank you.

Address 2202 E. 5th St. Superior

I am a student at the University of Wisconsin-Superior. I am very concerned about the statutory language for tuition flexibility in the governor's proposed budget for the 2001-2003 biennium.

The Board of Regents is an un-elected body, and would therefore not be accountable to constituents and voters. Thus the UW System would be privatized and the state's role would only be to subsidize a private institution. This would pave the way for massive tuition hikes which have hit other universities. Without legislative oversight of tuition levels, nothing stands in the way of rapidly increased fees.

The state must adequately fund the UW System and not give the Board of Regents the power to raise tuition without legislative oversight. I am calling on you to remove the statutory language regarding tuition flexibility from the 2001-2003 biennial budget.

Thank you.
