REPORT TO LEGISLATURE

NR 20, Wis. Adm. Code
Trout fishing on the inland waters of Wisconsin

Board Order No. FH-14-02
Clearinghouse Rule No. 02-016

Statement of Need

The proposed rule changes contain the statewide proposal for simplification of the inland trout regulations. The proposed rule simplifies the trout fishing regulations by eliminating category 1 (10 bag, no size limit), reducing the different types of special regulations (category 5), and adjusting the regulations on many waters to make them more effective. The regulations are detailed by county in the analysis that is a part of the proposed rule.

Modifications as a Result of Public Hearing

In response to specific objection in the northern region, lakes that were proposed to go to a 12" minimum length and 2 daily bag were modified to retain the daily bag of 5. These changes are in:

Oneida County the lakes were Little Bass, Big Carr, Dorothy, Perch (T36N R7ES2), and Squash (T39N R8E S19) and Clear (T39N R7E S16) lakes.

Vilas County the lakes were Shannon, Wildwood, Lac du Lune, Spectacle, and Stormy lakes

The following corrections were made to the rule order due to typos not caught until after the Spring Hearings:

Chippewa County the closing date for the trout season is changed from September 30 to March 1 on Bradley, Dark, and Henneman lakes. The code was correct, but 3 lakes were left out of the narrative.

Sawyer County, Fiddler creek was mislabeled as Fiddler lake. The biologist made an announcement of the mistake at the hearing in Sawyer County.

Vernon County, NR 20.20(63)(c)3.a. mistakenly included that only artificial lures were allowed on the portion of the Timber Coulee and Bishop Branch. However that was not supposed to be the case, so the code was modified in this adoption order and artificial only is NOT required.

The following corrections were made after publication of the questionnaire but were caught prior to the Spring hearings and correctly presented verbally at the county hearings. Modifications were made to maintain MI-WI border consistency.

Florence County, the WI-MI boundary regulations that were proposed to be changed will instead be kept the same (On the Brule river the minimum length limit was proposed to change from 12 inches for brown trout and 8 inches for brook trout to 7 inches for all trout).

Forest County, the WI-MI boundary regulations that were proposed to be changed will instead be kept the same (On the Brule river the minimum length limit is changed from 12 inches for brown trout and 8 inches for brook trout to 7 inches for all trout). In addition, Brule creek downstream from Fishel road, Elvoy creek downstream from Kaine road, and Elvoy springs were supposed to be included in the "all other waters" (7" minimum length and 5 daily bag) instead of having no minimum length limit.

The following correction was made to maintain consistency among trout lakes in the northern region, which differ from the original proposal.

Lincoln County, the closing date for the trout season will not be changed from September 30 to March 1.

At the Natural Resources Board, the proposed regulation changes for the Wolf River in Langlade County were deleted.

Appearances at the Public Hearings and Their Positions

Public hearings were held in all 72 counties on April 8, 2002. The vote tally for the proposed rules was 4,662 – 1,611.

Response to Legislative Council Rules Clearinghouse Report

The Department has considered all comments from the Clearinghouse Report and the rules have been modified accordingly.

Final Regulatory Flexibility Analysis

The proposed rules affected individual anglers. Therefore, a final regulatory flexibility analysis is not required.

SUMMARY OF RULE: The Department is recommending that the Natural Resources Board adopt orders FH-04-02 and FH-14-02, proposed rule revisions from the 2002 Spring Fish and Wildlife rule hearings. These proposals were suggested by staff in Fisheries Management and Habitat Protection and Law Enforcement with input from Legal Services. These proposals were presented at the Spring Fish and Wildlife Hearings, held statewide on April 8, 2002. Proposed changes include: simplification of the inland trout regulations, modification of the daily bag limit for cisco and whitefish to include lake herring and hybrids and changing the bag limit to 10 fish in total, increasing the minimum length limit for muskellunge on Green Bay to 50", modification of the closed season for yellow perch on Lake Michigan to May 1-June 15 (open season June 16-April 30), elimination of the minimum length limit for salmon on Lake Superior, increasing the minimum length limit for brook trout to 20" and decreasing the daily bag limit to 1 on Lake Superior, establishing a minimum distance from all fishing lines that an angler must remain within during the open water fishing season, increasing the minimum length limit to 18" and decrease the daily bag limit for bass on the lower Wisconsin river from the Prairie du Sac dam downstream, establishing sturgeon spearing hours on Lake Winnebago from 6:30 A.M. to 12:30 A.M. and requiring registration of speared sturgeon by 1:30 P.M. on the day speared, and 12 proposed rule changes of primarily local interest.

Re: Clearinghouse Rule No. 02-016
Trout fishing on the inland waters of Wisconsin

Dear Representative *DuWayne* Johnsrud:

On July 17, 2001, the Assembly Committee on Natural Resources requested the Department of Natural Resources to consider modifications to Clearinghouse Rule No. 02-016 relating to trout fishing on the inland waters of Wisconsin.

This letter is to inform you that the Department is not proposing any modifications to the proposed rule.

Under s. 227.19(4)(b)2., Stats., the Department of Natural Resources refers this rule to your Committee for an additional 10 working day review on this decision. If the Department does not hear from you within 10 working days of the receipt of this notification, the Department will continue processing this rule.

Sincerely,

Darrell Bazzell
Secretary
