Assumptions Used in Arriving at Fiscal Estimate

This bill will have no fiscal impact unless a transmissible spongiform encephalopathy (TSE) is discovered in a non livestock, commercially reared animal. This will also be impacted by what is defined as a commercially raised animal. At this time the department cannot estimate what the cost of such an event would be.

If cattle were condemned due to the discovery of bovine spongiform encephalopathy (BSE) in Wisconsin, they would be covered by the current indemnity language. The specific inclusion of BSE under 95.31 will not increase the department's authority to indemnify or condemn cattle so it would have no additional fiscal impact.

Long-Range Fiscal Implications
