Motor vehicle fuel tax exemption for school districts							

Assumptions Used in Arriving at Fiscal Estimate

Under current law, an excise tax is imposed on gasoline and diesel fuel sold in the state. This bill creates an excise tax exemption for gasoline or diesel fuel sold to and used by a school district in Wisconsin to transport students to and from school activities, and an exemption for gasoline and diesel fuel sold to a person who transports students to and from school activities, pursuant to a contract with a school district.

Based on the information received from the Department of Public Instruction, in 2003 school districts spent \$9.07 million on motor fuel, which is equivalent to the consumption of 5.57 million gallons of fuel, based on the average price of fuel of \$1.63 per gallon. Based on statewide growth in fuel consumption, fuel consumption by school districts in Wisconsin was estimated at 5.87 million gallons in FY2005-06 and at 5.94 million gallons in FY2006-07. Furthermore, the fuel tax rate, which is adjusted annually for inflation, was estimated by the Department at 29.9 cents per gallon for FY2005-06 and at 30.5 cents for FY2006-07, based on the projected U.S. consumer price index. Based on the estimated future consumption of fuel by school districts and the estimated fuel tax rate, the tax revenue loss is projected at \$1.75 million in FY05-06 and \$1.81 million in FY06-07.

Data are not available on which to base an estimate of excise taxes on gasoline and diesel fuel paid by persons who transport students to and from school activities, pursuant to a contract with a school district.

The Department of Revenue would incur one-time costs of \$28,100 to develop and revise computer applications. The bill does not provide funding for these costs.

Long-Range Fiscal Implications
