Individual and corporate tax credit for certain WHEFA bonds re: educational facility								

Assumptions Used in Arriving at Fiscal Estimate

Under current law, the Wisconsin Health and Educational Facilities Authority (WHEFA) may issue bonds to finance any project undertaken by an educational institution for an educational facility. This bill has two purposes. First, it creates an individual and corporate income tax exemption for bonds issued by WHEFA for that purpose, on or after the effective date of this bill. Second, the Wisconsin Association of Independent Colleges and Universities (WAICU) is added to the definition of "educational institution" and certain WAICU facilities are added to the definition of "educational facilities".

Only WHEFA bonds issued for educational purposes qualify for this tax exemption. Based on discussions with WHEFA staff, it is estimated that about 10% of the bonds issued in any given year are for educational purposes. Total issues average \$600 million annually, and WHEFA bonds earn an average of 5% interest. It is assumed that approximately 50 percent of WHEFA bonds are purchased by Wisconsin residents; thus, the bill would exempt about \$1.5 million in interest earnings from annual issuances (\$600 million x 10% x 5% x 50%). Applying the average marginal tax rate of 5.5% to this amount shows that the bill would reduce revenues by \$82,500 in FY07.

In each subsequent year, the new issue of bonds will add to the amount of interest earnings that are exempt from income tax. Interest earnings on bonds issued in the second year will accumulate with those from the first year, and so on, making the fiscal effect larger each year. Assuming the circumstances described above continue, the revenue decrease of \$82,500 in FY07 will increase by \$82,500 every year through FY16. At this point, it is assumed that the issuance of new bonds will be matched by the retirement of old bonds through repayment and refinancing, and equilibrium will be achieved. This balance will be achieved around FY16 when the total annual fiscal effect will be approximately \$825,000.

If this bill is adopted before July 31, 2005, the exemption will apply to bonds issued from that date. This would mean that issuances in the final seven months of 2005 would be eligible for the exemption, and, using assumptions from above, the fiscal effect in FY06 would be approximately \$50,000. If the adoption comes after July 31, 2005 however, the bonds to which this exemption first applies will be those issued in 2006. This would mean that the first fiscal effect would be seen in FY07 as described above.

Long-Range Fiscal Implications
