Subject					
Individual income tax credit for certain social security benefits					

Assumptions Used in Arriving at Fiscal Estimate

Under current Wisconsin law, up to 50% of social security benefits are taxable when the recipient's income exceeds \$25,000 for a single individual or \$32,000 for a married couple filing jointly. This bill creates a nonrefundable individual income tax credit for taxable amounts of social security benefits. As drafted, the bill only allows those taxpayers that are taxed on more than 50% of their social security to claim this credit. Anyone taxed on only 50% of their social security benefits could not claim the credit. The bill phases in the credit over five years as follows: 20% in 2006, 40% in 2007, 60% in 2008, 80% in 2009, and 100% in 2010. The credit is calculated by multiplying the taxpayer's taxable social security benefits by their marginal tax rate and then by the allowable credit beginning with 20% in 2006 as stated above.

According to a simulation using the 2003 Wisconsin Individual Income Tax Model, adjusted to reflect current law and the growth in social security benefits from 2003 to the years affected, this bill, as drafted, would reduce state revenues by approximately \$342 million from tax year 2006 through tax year 2010. Assuming the revenue loss is partly experienced through estimated payments, the fiscal year revenue losses would be as follows: \$7 million in FY2006, \$24 million in FY2007, \$43.4 million in FY2008, \$65.4 million in FY2009, \$91 million in FY2010, and \$106 million in FY2011 and thereafter.

If the bill includes all those with taxable social security, and not just those that are taxed on more than 50% of their social security benefits, then the fiscal effect would be as follows: \$8.5 million in FY2006, \$28.4 million in FY2007, \$51.3 million in FY2008, \$77.4 million in FY2009, \$107.2 million in FY2010, and \$125 million in FY2011 and thereafter.

The bill would result in an increase in departmental costs associated with one-time programming costs of \$20,000 and annual costs of \$50,750 for 1.25 FTE positions.

Long-Range Fiscal Implications

If this bill is adopted as drafted, it will reduce state tax revenues annually by \$106 million in FY2011 and thereafter because the credit will apply to 100% of taxable social security benefits beginning in tax year 2010.

LRB Number 05-2802/1	Introduction Number SB-190
Subject	
Individual income tax credit for certain social security benefits	
I. One-time Costs or Revenue Impacts for State and/or Local Government (do not include in annualized fiscal effect):	
-\$7 million in FY2006; -\$24 million in FY2007, -\$43.4 million in FY2008, and -\$65.4 million in FY2009 and \$91 million in FY2010. \$20,000 increased costs for adding a line to the individual income tax system.	
II. Annualized Costs:	Annualized Fiscal Impact on funds from:
	Increased Costs Decreased Costs
A. State Costs by Category	
State Operations - Salaries and Fringes	\$50,000
(FTE Position Changes)	
State Operations - Other Costs	750
Local Assistance	
Aids to Individuals or Organizations	
TOTAL State Costs by Category	\$50,750 \$
B. State Costs by Source of Funds	
GPR	50,750
FED	
PRO/PRS	
SEG/SEG-S	
III. State Revenues - Complete this only when proposal will increase or decrease state revenues (e.g., tax increase, decrease in license fee, etc.)	
	Increased Rev Decreased Rev
GPR Taxes	\$ \$-106,000,000
GPR Earned	
FED	
PRO/PRS	
SEG/SEG-S	
TOTAL State Revenues	\$ \$-106,000,000
NET ANNUALIZED FISCAL IMPACT
