LRB Number	05-3643/1	Introduction Number	SB-397	Estimate Type	Original
Description Domestic partnership					

Assumptions Used in Arriving at Fiscal Estimate

SB 397 provides requirements for forming a legal relationship of domestic partnership. The procedure established by this bill is similar to the procedure for obtaining a marriage license and creates a registration system for legal documents proclaiming domestic partnership. The procedure will require changes in information technology systems, forms, and record keeping by the Department.

Under this bill, the Department must set up a record filing system for the new legal documents in the Department's Vital Records office. There will be some one-time and ongoing costs associated with this new system. Assuming that 10,000 domestic partnerships will be registered each year, there will be one-time costs of \$12,300 for system and form development. There will also be a one-time cost of \$4,500 to train local county clerks and registers of deeds in the new procedure.

As with marriage licenses, the Department will need to provide certified copies of the domestic partner agreement. This will result in one-time costs of \$6,100 for the creation of a new service code and a microfiche index and the revision of the forms which are used to purchase vital records. If the Department converts to an on-line records system for vital records management in the future, there will also be additional costs to convert domestic partnership declarations.

There will be an ongoing workload increase to the Vital Records Office of the Department as a result of this bill. Based on the experience of other states that allow domestic partnerships, there will be at least 20 hours a week of additional work for form processing, answering questions, and compiling reports. The Department estimates that .5 GPR Program Assistant 2 FTE, at a cost of \$18,200 GPR annually, will be required to enable the Vital Records Office to fulfill the requirements of this bill. The one-time cost for this position will be \$4,000. Additional on-going costs, including form printing and mainframe storage charges, are estimated to be \$6,200.

Total one-time costs of this bill will be \$26,900 GPR. Total annual costs of the bill will be \$24,400 GPR.

County Costs

SB 397 allows county clerks to charge a fee for the issuance of declarations of domestic partnership that is the equivalent of the statutory fee for marriage licenses, which is currently \$49.50. Of this fee, \$25 is to be paid into the state treasury and the remainder is to become part of the funds of the county. If 10,000 licenses are issued per year, counties will receive \$245,000 from fees and the state treasury will receive \$250,000 from this provision annually.

SB 397 also allows clerks to charge the standard notary fee for domestic partnership declarations. This amount varies by county. Counties will receive additional revenue, depending on the number of declarations issued and the amount of the county fee. It is not possible to predict what this revenue will be.

It is estimated that the one-time implementation costs to change their data systems which counties will incur will be between \$2,500 and \$3,500 per county.

Under current law, counties are allowed to charge additional fees to cover the costs of issuing copies of marriage licenses, but SB 397 does not include this provision for domestic partnership declarations. It is not possible to estimate the number of domestic partnership declarations each county will be required to process. The costs of issuing marriage licenses varies among counties and it is assumed that the cost of issuing domestic partnership declarations will also vary. Because of the variation in county costs and uncertainty about the number of declarations by county, it is not possible to estimate the cost to county clerk offices of the provisions in this bill.

Long-Range Fiscal Implications
