Assumptions Used in Arriving at Fiscal Estimate

Under current law, an individual who has been granted state status as a state agent under the Volunteer Health Care Provider Program (VHCPP) may be defended by the attorney general for acts performed during the lawful course of his or her duties. If a civil action arises out of an act committed by the provider during the course of that person's duties, the state provides legal counsel and any judgments against the provider are paid by the state and capped at \$250,000.

This bill designates as a state agent of the Department a pharmacist or pharmacy technician who provides voluntary, unpaid services at a nonprofit agency.

Liability claims against the state are paid from funds administered by the Department of Administration. The Department pays premiums to DOA for liability insurance. The Department paid \$650,203 for general liability insurance in FY 06. It is possible that, if these individuals who become volunteer pharmacists or pharmacy technicians were added to the Department for liability purposes, the number of liability claims to the state would increase. If liability claims increased, the Department's liability premiums would also increase. It is not possible to project what the amount of this increase would be because the extent of possible increased liabilities is not known.

Long-Range Fiscal Implications
