The intent of this draft is to provide \$12.6 million in general obligation bonding authority to the department to be used to obtain federal funds under the provisions of the Great Lakes Legacy Act of 2002 (see attached sheet for background). Bonding authority is to be used for contaminated sediment removal in the Great Lakes or tributary rivers. Specific projects may be decided upon by the department. Debt service would be paid by GPR.

# Great Lakes Legacy Act of 2002

---

Great Lakes National Program Office

January 2004

---

*These are the 31 U.S. Areas of Concern.*

Contaminated sediment is a significant problem in the Great Lakes basin. For decades, industrial sources contributed substantial amounts of harmful pollutants to the Great Lakes, including polychlorinated biphenyls (PCBs), heavy metals and polycyclic aromatic hydrocarbons (PAHs). Recent improvements in controlling these discharges have greatly reduced the amount of contaminants being released into the environment, but high levels of contamination still remain in the sediment as a “legacy” of the historical contamination. These contaminants can subsequently enter the food chain where they can cause adverse effects to human health and the environment.

To help address the contaminated sediment problem, the Great Lakes Legacy Act of 2002 was signed into law on Nov. 27, 2002. The Act authorizes \$270 million in funding over five years, beginning in fiscal year 2004, to specifically assist with the remediation of contaminated sediment in the 31 designated U.S. Areas of Concern (AOCs).

## **Three Components of the Act**

### **1. Projects: Authorizes Up to \$50 Million Per Year**

#### **Projects**

- Must lie within a U.S. Area of Concern; and
- Monitor or evaluate contaminated sediment; or
- Implement a plan to remediate contaminated sediment; or
- Prevent further or renewed sediment contamination.

#### **Remediation Projects Requirements**

- 35 percent non-federal match.
- Site will not suffer significant, further or renewed contamination.
- Site assessment complete or being addressed.
- Remedial alternatives evaluation complete or being addressed.
- Short-term/long-term effects analysis complete or being addressed.
- Remedial design work under way or complete or being addressed.

**Non-Remediation Projects Requirements (i.e.; monitor/evaluate, source control)**

- 35 percent non-federal match.

Priority will be given to the following projects as specified in the Legacy Act:

- Remedial action for contaminated sediment.
- Projects that have been identified in a Remedial Action Plan and are ready to be implemented.
- Projects that will use an innovative approach, technology or technique that may provide greater environmental benefits, or equivalent environmental benefits at a reduced cost.
- Projects that include remediation to be commenced not later than one year after the date of receipt of fund.

**2. Research and Development: Authorizes Up to \$3 Million Per Year**

- Conduct research on the development and use of innovative approaches, technologies and techniques for the remediation of contaminated sediment at U.S. AOCs.
- No non-federal match required.

**3. Public Information: Authorizes Up to \$1 Million Per Year**

- Provide funding for public outreach and public information at U.S. AOCs regarding sediment remediations.
- No non-federal match required.

Hi Becky,

Please make the following changes to draft 1454 related to contaminated sediment removal bonding. The debt service for this bonding is to be SEG-supported from the environmental fund rather than GPR. Also, the amount of bonding authorized is to be \$17,000,000 rather than \$12,600,000. The other drafts I just received, 1113 and 1114, look fine. Thanks,

Andrew

Frank:

Per Sara's request, Aaron Gary is already adding in the language on his DOT appropriation. I will do a global search of the bill; before I only searched for appropriations feeding into s. 20.866 (1) (u).

Becky:

Do you want to add the language in s. 20.370 (7) (br) into 07-1454 and update the Master? I can certainly do it if you'd like me to.

Rick –

We have just noticed that there are two new debt service appropriations created in the budget that we did not add the new swap language to – those are shown on the attached drafts. Please add the swap payment authority language to these two appropriations.

Is there any way to search globally for any other inadvertent omissions?
