

Fiscal Estimate Narratives

DOT 1/18/2008

LRB Number	07-0948/2	Introduction Number	AB-0639	Estimate Type	Original
Description Electronic access by law enforcement agencies to photographs on motor vehicle operators licenses and identification cards					

Assumptions Used in Arriving at Fiscal Estimate

BILL SUMMARY

- Requires DOT to make available to the Department of Justice any photo (image) taken for a driver license or identification card
- Requires the Department of Justice to make the image available to law enforcement agencies through their TIME system
- The image must be in a digital format
- The image must be available to the DOJ within 30 days of capture

ASSUMPTIONS

- DMV's image database is stored on a unique server separate from other DMV data (such as vehicle and driver records) currently accessible to DOJ
- The server is maintained by DMV's license and identification card contractor, Viisage.
- Driver license and identification card photos (images) are accessible through a software interface provided by Viisage, access within DMV is restricted
- In order to provide electronic access a system will have to be developed to:
 - Process the query received from DOJ's TIME system
 - Use that query to perform a search of the image database
 - Procure the digital image from the database
 - Transmit the digital image via TIME to DOJ to disseminate to the requestor
 - Resolve any firewall and secure ID issues
- Alternatively, a server could be set up at DOJ to house a copy of the image database. A system would need to be developed to allow Viisage to periodically update that server with new images at least every 30 days.

CONCLUSION

The cost of system development is indeterminable. DOT will need to work with DOJ and the Viisage corporation to develop a solution to meet the requirements of this proposal.

Long-Range Fiscal Implications
