Assumptions Used in Arriving at Fiscal Estimate

The bill directs the Department to assist DATCP and the University of Wisconsin-Extension with the promotion, development and use of forestry products that are used to produce alternative fuels, heat or electricity. In addition, the bill expands DATCP's agricultural research and development grant program to include forestry-related research and development and requires DATCP to consult with the Department when evaluating a forestry-related grant application.

Assumptions

Work comparable to that described in the bill regarding the promotion, development and use of forestry products for fuel is already being performed by the Division of Forestry through the utilization and marketing program; therefore, this section of the bill has no fiscal impact.

The Division of Forestry will need to reallocate approximately 40 hours of staff time per year to assist DATCP with reviewing and evaluating forestry-related grant applications.

Long-Range Fiscal Implications
