### ***Analysis by the Legislative Reference Bureau***

Current law prohibits the disposal of certain materials in solid waste disposal facilities, such as landfills. The law prohibits the disposal of oil absorbent materials that contain waste oil in a solid waste disposal facility, except that the prohibition does not apply to the disposal of less than one gallon of oil absorbent materials that contain waste oil resulting from a nonroutine spill.

This bill replaces the general prohibition on disposing of oil absorbent materials that contain waste oil in a solid waste disposal facility with a narrower prohibition. Under this bill, a person may not dispose of oil absorbent materials that contain waste oil in a solid waste disposal facility unless free-flowing oil has been drained from the materials and the materials are not hazardous waste.
