Fiscal Estimate Narratives

DATCP 1/24/2012

LRB Number	11-3564/1	Introduction Number	SB-370	Estimate Type	Original
Description Regulating certain substitutes for ozone-depleting refrigerants					

Assumptions Used in Arriving at Fiscal Estimate

Current state law prohibits the sale of ozone-depleting refrigerants (ODRs) in containers that hold less than 15 pounds of the substance ("small cans"). The installation and repair of motor vehicle air conditioners that use these refrigerants must be performed by businesses and service technicians registered by the department. Service technicians are required to complete a department-approved training program. Current law also authorizes the department to promulgate rules that restrict the sale and use of refrigerants used as ODR substitutes.

Under this bill, the department may not promulgate a rule that prohibits the sale of an ODR substitute in a container holding less than 15 pounds of the substance. The department would also be prohibited from promulgating a rule that regulates an individual's non-commercial use of an ODR substitute in a container holding less than 15 pounds of the substance. Therefore, the department would be required to repeal portions of the current rule that prohibit the sale and noncommercial use of ODR substitutes in containers that hold less than 15 pounds.

The fiscal impact of this bill on the department is likely to be minimal.

Long-Range Fiscal Implications
