

## Fiscal Estimate Narratives

DA 4/3/2012

LRB Number	11-3851/1	Introduction Number	AB-0727	Estimate Type	Original
<b>Description</b> Manufacture and sale of food and beverage containers that contain bisphenol A and providing penalties					

### Assumptions Used in Arriving at Fiscal Estimate

Current law prohibits the manufacture or sale at wholesale of a child's container that contains bisphenol A (BPA). In addition, retailers are prohibited from selling a child's container that contains BPA. The bill also prohibits the manufacture or wholesale of food containers that contain BPA, unless the food container is conspicuously labelled as containing BPA.

Prosecutors anticipate a slight increase in their workload should the bill be enacted, but after violators have been prosecuted, they anticipate there will be no fiscal effect on their offices.

### Long-Range Fiscal Implications

If the bill is enacted, prosecutors anticipate no long-term fiscal impact on their offices.
