

## Fiscal Estimate Narratives

DOT 3/12/2012

LRB Number	11-2334/1	Introduction Number	SB-528	Estimate Type	Original
<b>Description</b> Electronic voter registration, verification of certain registrations, and proof of residence for voting in an election and granting rule-making authority					

### Assumptions Used in Arriving at Fiscal Estimate

#### BILL SUMMARY

The proposal requires DOT to enter in to an agreement with the Government Accountability Board (GAB) for the purpose of matching personally identifiable information on the official voter registration list maintained by the board.

The GAB shall maintain a system that instantly electronically verifies with DOT the validity of information provided by an elector when completing an application to register for voting purposes. Upon this verification, DOT will be required to provide GAB with an electronic copy of the registrant's signature as shown on the applicant's driver license or identification card.

#### ASSUMPTIONS

DOT must enter into an agreement with the GAB to electronically provide personally identifiable information about persons holding valid Wisconsin driver's licenses and identification cards, including forwarding a copy of the person's electronic signature, as shown on his or her driver license or identification card, back to GAB once the information has been verified. The information is to be provided for the purpose of facilitating the registration of eligible electors and to create a statewide registration list. The information shall include the person's full name and date of birth, their current address, and driver license or identification card number.

The GAB shall maintain a system that instantly electronically verifies with DOT the validity of information provided by an elector when completing an application to register for voting purposes.

#### CONCLUSIONS

DOT computer system programming required to create the system to provide an electronic signature and instantly verify the required personally identifiable information provided by an elector when completing an application to register for voting purposes will require an estimated 237 days of development time at a cost of approximately \$173,340.

Other than the cost of creating the computer systems, there should be minimal FTE or cost impact on DOT.

The fiscal impact on local governments is indeterminate.

### Long-Range Fiscal Implications

See above.
