Description					
Payment of unemployment insurance benefits under a work-sharing program					

Assumptions Used in Arriving at Fiscal Estimate

This program provides an additional means for employers interested in reducing employee hours, but wishing to retain employees. This allows for distributing hour reductions across staff rather than full, individual layoffs. This fiscal estimate assumes this program does not lead to additional hours in layoffs but rather a redistribution of the hour reduction and benefits paid. For this reason, the amount of benefits paid is expected to be similar, but distributed among more individuals.

Federal funding is available for both benefit payments and administrative costs. Federal administrative funding is not affected by sequestration however, federal funding for benefit payments has been reduced from 100% to 94.9% until the close of federal FY2013. If sequestration is not extended beyond federal FY2013, federal funding for benefits would increase to 100%, through August 2015. After 2015 there is no federal funding for benefit dollars and benefit payments will again come from the trust fund.

For administrative costs, Wisconsin could receive up to \$641,216 of federal monies for implementation costs and \$1,282,434 for promotion and enrollment activities. However, if the program ends in less than 5 years, these federal administrative dollars may be recouped.

Long-Range Fiscal Implications

This program provides an additional means for employers interested in reducing employee hours, but wishing to retain employees. This allows for distributing hour reductions across staff rather than full, individual layoffs. This fiscal estimate assumes this program does not lead to additional hours in layoffs but rather a redistribution of reduced hours. For this reason, the amount of benefits paid is expected to be similar, but distributed among more individuals.

Through August 2015, benefits would be almost entirely federally funded providing a one-time savings to the trust fund. After August 2015 there is no federal funding for benefit dollars and benefit payments will again come from the trust fund. Annual costs will be minimal for staff time fielding inquiries and verifying program qualifications. These costs can be absorbed with existing resources.

NOTE: There could be local impacts due to reimbursable employers. However, at the time this fiscal was due, the LOCAL FISCAL EFFECT portion above was not available.
