

## Fiscal Estimate Narratives

DOT 3/1/2013

LRB Number	13-1434/1	Introduction Number	AB-0041	Estimate Type	Original
<b>Description</b> Creating a local freight bridge program, providing an exemption from emergency rule procedures, granting rule-making authority, and making an appropriation					

### Assumptions Used in Arriving at Fiscal Estimate

This bill creates a competitive local freight bridge improvement program administered by WisDOT to help local governments upgrade or replace deficient bridges.

The legislation transfers \$10 million dollars from the general fund this biennium to establish a fund of \$5 million dollars annually. The legislation also authorizes .4 FTE position to administer this new program. The program requires a 10 percent local match, so the \$5 million dollars will actually fund \$5.5 million dollars worth of bridge improvements in the state.

A typical bridge lifespan is 60-80 years. It is known that there are currently 8,954 bridges on local roads that are open to heavy trucks exceeding 80,000 pounds. There are also 659 bridges on local roads that are not currently open to heavy vehicles but could potentially apply to replace with a bridge that would be open to heavy trucks. On average, between 125 and 166 bridges should need complete end-of-life replacement each year. Deck overlays typically occur at 25 years and 65 years of a bridge's life. After 50 years, a bridge typically needs a complete deck replacement. In all, 250-330 bridges per year should need a deck overlay, and another 125-166 should need a complete deck replacement.

So each year, 500-664 bridges on the local system will be in need of significant improvement, either replacement, deck replacement or pavement overlay. Assuming 1/3 of bridges needing improvement apply to the program results in 166-221 total applications.

Each application will take between 2 and 3 hours to review and rank. Total hours 332-663. Program funding should allow state awards for 5-20 bridges per year.

Awarding contracts to 5-20 bridges per year and overseeing the awarded program, assume 10 hours per awarded contract. Total hours 50-200 hours

General Administration of the program. 200 hours

Soliciting applications and raising awareness among potential local applicants. 100 hours.

Total estimated employee hours: 652-1063

### Long-Range Fiscal Implications
