Assumptions Used in Arriving at Fiscal Estimate

This bill raises the minimum wage for employees generally as follows: on effective date \$8.50 per hour; one year after effective date \$10 per hour; two years after effective date \$11.50 per hour; three years after effective date \$13 per hour; four years after effective date \$14 per hour; five years after effective date \$15 per hour.

Six years after the bill's effective date, the bill requires the Department of Workforce Development annually to promulgate rules revising the minimum wages by determining the percentage difference between the consumer price index for the preceding 12-month period and the consumer price index for the year before the preceding year.

The bill eliminates the prohibition of a city, village, town, or county from enacting and administering an ordinance establishing a minimum wage.

The Department of Workforce Development estimates this legislation would create 200 additional wage complaints annually because the state minimum wage rates would be higher than the federal rates. To meet this increased workload, the DWD Equal Rights Division would require an additional Equal Rights Officer (1.0 FTE) at a cost of \$69,000 GPR. There would be a one-time GPR start-up cost of \$3,500 to staff the position. Finally, annual GPR costs of \$5,000 are needed to update and reprint existing documentation relating to state minimum wage laws.

Local governments that employ people at the current minimum wage would have to raise the wage rate each year, however, the cost to local governmental units are indeterminate at this time.

Long-Range Fiscal Implications

To meet this increased workload, the DWD Equal Rights Division would require an additional Equal Rights Officer (1.0 FTE) at a cost of \$69,000 GPR. Annual GPR costs of \$5,000 are needed to update and reprint existing documentation relating to state minimum wage laws.
