1 AN ACT *to create* 146.893 of the statutes; **relating to:** medically accurate
2 information.

Analysis by the Legislative Reference Bureau

This bill creates a right and obligation for a health care provider to provide medically accurate information to patients to whom the health care provider provides medical care. The bill also creates a right for a patient to receive medically accurate information from a health care provider. The bill prohibits interference or other diminishment of the rights and obligations relating to medically accurate information, and further prohibits employment retribution based upon a health care provider's exercise of the rights and obligations relating to the provision of medically accurate information.

Under the bill, the state, including any political subdivision or instrumentality of the state, may not do either of the following: 1) require any information that is not medically accurate to be included on a procedure or treatment form; or 2) prohibit a health care provider from including medically accurate information or from deleting information that in the health care provider's medical judgment is either not medically accurate or not somehow relevant to the patient's specific request for care or treatment.

Under the bill, a patient or health care provider may file a civil action for a violation related to the patient's right to accurate medical information. The bill allows the person to seek, in addition to injunctive relief and punitive damages, compensatory damages that reflect his or her actual damages or statutory damages of \$5,000 per violation.

ASSEMBLY BILL 657

A statutory damages option of \$20,000 per violation is available to a health care provider who files a civil action after experiencing employment retribution for his or her provision of medical care, after being prevented from providing medically accurate information to a patient, or after being required to provide medically inaccurate information to patient.

The bill also authorizes the attorney general to commence a civil action if he or she has reasonable cause to believe that any person is violating a patient's or health care provider's rights relating to the receipt or provision of medically accurate information. Under the bill, a court may award injunctive relief and compensatory damages and an additional assessment of up to \$20,000 for the first violation and \$40,000 for each subsequent violation.
