- 1     **AN ACT** to amend 346.01 (2); and to create 38.04 (4) (e) 8., 115.28 (11) (h), 343.71  
2           (5) (h), 346.275 and 346.30 (6) of the statutes; relating to: liability of owners  
3           of vehicles involved in certain speed limit and failure to yield right-of-way  
4           violations, driver education instruction, and providing a penalty.

***Analysis by the Legislative Reference Bureau***

This bill authorizes the citation of owners of vehicles for certain highway work zone speed and failure to yield violations. The bill also requires driver education instruction related to highway work zone safety.

Current law imposes, with exceptions, liability on the owner of a vehicle that is observed violating certain traffic laws, including illegally passing a school bus or fire truck, illegally crossing a railroad crossing or controlled school crossing, and failing to yield the right-of-way to an emergency vehicle or a funeral procession.

This bill imposes liability on the owner of a vehicle involved in a violation related to the failure to yield the right-of-way to certain persons engaged in maintenance or construction work in a highway work zone. Under this bill, a flagman who observes a vehicle involved in this sort of a failure to yield violation may report the violation to a traffic officer so that a citation may be issued.

An owner is subject to the same forfeiture that would be applicable to the vehicle operator for the violation, but the owner's operating privilege may not be suspended or revoked, and no demerit points may be recorded against the owner's driving record. Among the defenses available to an owner, the owner is not liable if the owner identifies the operator of the vehicle at the time of the violation and the

operator admits to being the operator or if the owner has reported the vehicle as stolen. If an owner successfully asserts certain defenses, the person operating the vehicle at the time of the violation may be charged with the violation.

Under current law, the Department of Public Instruction must approve certain driver education courses offered by school districts and establish minimum standards for driver education courses offered by private driver schools, the Technical College System Board must approve courses of study for each program offered in technical college district schools, including driver education courses, and the Department of Transportation licenses private driver schools and DOT may not license a driver school unless its course of instruction includes the content required for TCSB approval of a driver education course.

Under this bill, all approved driver education courses must acquaint each student with the hazards posed by highway work zones and provide at least 30 minutes of instruction in safely dealing with these hazards.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

9 be made by certified mail addressed to the owner's last-known address.

10 (5) (a) Except as provided in par. (b), it is not a defense to a violation of this
