11 defined as autocycles.

Analysis by the Legislative Reference Bureau

This bill creates a definition of an autocycle, which is a three-wheeled motor vehicle with operation controls similar to an automobile.

Under current law, there are two types of motorcycles. A “Type 1 motorcycle” is a motor vehicle which has either two wheels in tandem and a seat for the operator or three wheels and unenclosed seating for the operator and passengers. A “Type 2 motorcycle” is a motor vehicle with at least three wheels and an enclosed space for the operator and passengers. The bill eliminates the Type 1 and Type 2 motorcycle definitions and defines “motorcycle” as a motor vehicle originally manufactured with motive power, a seat or saddle requiring the rider to sit astride, not more than three wheels in contact with the ground, steering controlled by handlebars, and acceleration and braking controlled with handlebar and foot controls and that is capable of speeds in excess of 30 miles per hour.

The bill defines “autocycle” to mean a motor vehicle that has three wheels in contact with the ground, is designed with seating that does not require operators or any occupants to straddle or sit astride it, has a steering wheel, and is originally manufactured to meet federal motor vehicle safety standards for motorcycles. Under current law, no motor vehicle dealer may engage in business as a motor vehicle dealer without the appropriate dealership license. The bill provides that a motor vehicle dealer currently engaged in the sale of autocycles may continue selling autocycles without having to acquire a different type of dealership license.

Under current law, a motor vehicle may not be operated upon a highway in this state without a current, valid registration. Generally, the fee for registering an automobile with the Department of Transportation is \$75 annually. The fee for registering a motorcycle is \$23 biennially. Under this bill, the fee for registering an autocycle is \$45 annually.

Under current law, no person may operate a motor vehicle upon a highway in this state unless the person possesses a valid operator’s license. Additional endorsements are required for the operation of certain vehicles, including motorcycles. This bill classifies autocycles as “Class D” vehicles, which means they may be operated with the regular license issued by DOT without the need for additional endorsements.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
