Description creating an individual income tax deduction for certain income earned by an individual from the practice of psychiatry					

Assumptions Used in Arriving at Fiscal Estimate

The bill creates an individual income tax subtraction for income earned in Wisconsin by a psychiatrist from the practice of psychiatry. The deduction is limited to \$100,000 for psychiatrists who do not practice in a medically underserved area or \$200,000 for individuals who do practice in a medically underserved area. The deduction may not be claimed for more than five years, beginning once the claimant first claims the deduction. In addition, the deduction must be claimed initially within the first two years that a psychiatrist begins to practice in this state, or within the first two years that a psychiatrist returns to this state after practicing in another state for at least one year.

If an individual begins to claim the deduction but is unable to claim it for five consecutive years because he or she leaves the state, the individual must add to his or her tax that is due for the year in which he or she leaves the state the total gross tax that would have been due if the subtraction was not claimed for any year minus the amount of gross tax actually due for those years.

The federal Bureau of Labor Statistics estimates that there are 420 psychiatrists in Wisconsin, excluding self-employed psychiatrists. Moreover, the average annual wage is \$189,020. According to a survey by the American Medical Association, approximately 48.9% of psychiatrists are employees, implying a total count of Wisconsin psychiatrists of 859.

Based on simulation results using a \$200,000 subtraction maximum, the deduction would reduce tax by approximately \$9,630 per claimant on average. Using a \$100,000 subtraction maximum implies an average tax reduction of \$5,620 per claimant. It is not clear how many of the psychiatrists would qualify at each subtraction level. For illustration purposes, if psychiatrists are equally split between the two categories, the average tax reduction would be approximately, \$7,625 per claimant.

The bill limits the subtraction to new and returning practitioners. If psychiatrists are roughly equally allocated across forty-year careers, approximately 5% (2 out of 40) of psychiatrists would be eligible for the subtraction in the first year it is available (tax year 2020). Additionally, 2.5% would become eligible each year for the next four years. Under these conditions the bill could reduce revenue by approximately \$330,000 in fiscal year 2021, \$490,000 in fiscal year 2022, \$650,000 in fiscal year 2023, \$820,000 in fiscal year 2024, and \$980,000 in fiscal year 2025. Beginning in fiscal year 2026, the provision would reduce revenue by approximately \$820,000 annually thereafter.

If a larger (smaller) share of psychiatrists are eligible for the \$200,000 subtraction maximum, the fiscal effect of the bill would be larger (smaller). To the extent that the deduction encourages additional psychiatrists to practice in Wisconsin, the fiscal effect of the bill would increase. To the extent that psychiatrists leave the state, the additional tax add back would reduce the fiscal effect of the bill.

Long-Range Fiscal Implications
