Fiscal Estimate Narratives
DHS 1/30/2020

LRB Number 19-4473/1	Introduction Number AB-0722	Estimate Type Original
Description requiring pediatricians and pediatric specialists to view presentations about neuroimmune disorders in children		

Assumptions Used in Arriving at Fiscal Estimate

This bill requires each physician who specializes in general pediatrics or a pediatric specialty to view at least two hours of live presentations or webinars designated by the Department of Health Services about neuroimmune disorders by January 1, 2022. Under the bill, in designating a live presentation or webinar about neuroimmune disorders, DHS must consult with the Medical Examining Board and cannot designate live presentation or webinar unless the examining board approves it. DHS must designate several dates during both 2020 and 2021 for these live presentations and webinars and information about these presentations available on its website. Currently, no such program exists at DHS.

To satisfy the requirements of this bill, DHS estimates workload costs to be \$40,400 GPR and 1.0 LTE public health nurse advanced annually. The position will be responsible for identifying existing webinars and live presentations, coordinating with the Medical Examining Board, and making information pertaining to these webinars and live presentations available on the Department's website.

It is important to note that this estimate reflects only the costs of designating webinars and live presentations. If DHS were required to produce these materials, additional resources would be needed.

In sum, the total fiscal effect of this bill is an annual cost of \$40,400 GPR and 1.0 LTE. DHS is unable to absorb these costs internally.

Long-Range Fiscal Implications
