Fiscal Estimate Narratives DNR 6/18/2019

LRB Number	19-3048/1	Introduction Number	SB-264	Estimate Type	Original		
Description							
changes to the electronic waste recycling program and granting rule-making authority							

Assumptions Used in Arriving at Fiscal Estimate

The bill makes changes to the electronic waste (e-waste) recycling program.

Fiscal Effect

1. Revenues

The main fiscal impact comes from a change to the tiered annual registration fees paid by electronics manufacturers to the DNR. The current law has three manufacturer registration fee levels, based on the units of covered electronics sold to Wisconsin households and schools during a program year: \$0, \$1,250 and \$5,000. The bill would change the ranges for the number of units sold under which each of these fee levels would apply.

- \$0 fee: current law is fewer than 25 units sold; bill would adjust to fewer than 250 units
- \$1,250 fee: current law is 25 to 249 units sold; bill would adjust to 250 to 499 units
- \$5,000 fee: current law is 250 or more units sold; bill would adjust to 500 or more units

There would be a reduction in e-waste revenue from manufacturers in the 25 to 249 units category, since under the proposed thresholds those manufacturers would no longer pay a fee. For FY 2019, there are 39 manufacturers in this category, paying \$1,250 each for a total of \$48,750. This compares with 33 manufacturers in this category in FY2018, 28 in FY2017 and 35 in FY2016. Based on the assumption of about 39 manufacturers per year in this category, each paying a \$1,250 fee, annual revenues are estimated to decrease by \$48,750 (\$1,250 x 39).

There would be additional, but indeterminate, revenue loss from manufacturers that sell between 250 and 500 units, since under the bill they would pay an annual fee of \$1,250 instead of the current fee of \$5,000. Since the DNR does not have data on the specific number of units each manufacturer sells, there is no reliable way to estimate this additional revenue loss.

2. Costs

Because more manufacturers have registered than originally estimated when the law was passed in 2009, the Department does not expect the bill and the corresponding revenue loss to have a significant effect on core work.

The law does not add significant workload or long-term costs for the DNR; however, because electronic reporting forms would need to be updated, there would be one-time costs for IT work to make those updates during the first 1-2 years of implementation. A rough estimate of the additional costs is \$13,500 in FY2020 and \$5,000 in FY2021 (assuming the changes need to go into effect for the 2020 reporting).

Long-Range Fiscal Implications
