

Fiscal Estimate Narratives

DHS 2/11/2020

LRB Number 19-4567/2	Introduction Number SB-788	Estimate Type Original
Description opioid and methamphetamine data system and making an appropriation		

Assumptions Used in Arriving at Fiscal Estimate

This bill requires the Department of Administration (DOA) to issue a request for proposals to establish and maintain an opioid and methamphetamine data system to collect, format, analyze, and disseminate information on opioid and methamphetamine use. DOA would collaborate with and collect data from the Departments of Health Services (DHS), Children and Families, Corrections, Justice, and Safety and Professional Services.

The bill enumerates the specific data to be collected in DOA's request for proposals for the opioid and methamphetamine data system. Because the bill does not require DHS to collect, format, gather, analyze, or disseminate any new data on opioid or methamphetamine use, DHS would be able to rely on its current staff and resources to collaborate with DOA on providing the data it has available, while adhering to state and federal regulations. DHS staff would collaborate with DOA to identify the data DHS can share, and to identify the data DHS does not have available.

Long-Range Fiscal Implications
