Description					
interest on claims of excessive assessment and for recovery of unlawful property taxes					

Assumptions Used in Arriving at Fiscal Estimate

This bill changes the interest rate for payments made on a claim to recover unlawful taxes so that it is the same as the payments made on a claim of excessive assessment. Unlawful property taxes may include interest at the rate of 0.8 percent a month, while a claim of excessive assessment may include interest at the average annual discount rate determined by the last auction of six-month U.S. Treasury bills. The bill also allows the taxation district to collect from each underlying taxing jurisdiction its proportionate share of the interest paid on claims for excessive assessment or to recover unlawful property taxes.

The bill would decrease interest costs for local governments that choose to pay interest by an indeterminate amount: department data does not include interest since these amounts cannot be collected from the underlying taxing jurisdictions. The bill also allows the taxation district to collect an indeterminate amount of interest from each underlying taxing jurisdiction (increasing costs) paid on claims for excessive assessment or to recover unlawful property taxes.

Under the bill, the annual interest rate (simple interest) for unlawful property taxes would drop from approximately 9.60 percent to a rate based on the last six-month treasury auction, approximately 0.05 percent (June 14). The actual rate would vary based on the six-month U.S. Treasury bill auction results. For example, in September 2005 the discount rate was approximately 3.76 percent, while the March 2017 rate was approximately 0.90 percent. For 2020, \$4,564,500 in real estate chargebacks were approved.

One-time administrative costs of \$59,500 for programming changes cannot be absorbed. The department can absorb the minor annual costs.

Long-Range Fiscal Implications
