

Fiscal Estimate Narratives

DOT 11/8/2023

LRB Number	23-3731/1	Introduction Number	SB-0363	Estimate Type	Original
Description permits for the overweight transport of pig iron					

Assumptions Used in Arriving at Fiscal Estimate

The Department is unable to provide an estimate on increased costs for this change. While it is assumed that an increase in heavy truck traffic would lead to increased degradation of the pavement and structures, the Department has no reliable way to estimate the number of trips, origin and destination, and specific weight information of the vehicles. In addition, there is no generally accepted basic degradation factor that could be used in place of the specific information needed to estimate the impacts.

Long-Range Fiscal Implications

The long-range fiscal impacts are indeterminate. There will likely be increased pavement and structure deterioration, but the costs associated with maintenance and repair cannot be adequately estimated.
