2. To determine if there has been a violation of this subchapter, ch. ATCP 75 Appendix, or ss. 97.603 to 97.65, Stats.
3. To determine compliance with previously written violation orders.
4. To secure samples or specimens.
5. To examine and copy relevant documents and records provided such information is related to the operation of the restaurant.
6. To obtain photographic or other evidence needed to enforce this subchapter.

(b) Reinspections. 1. The department or its agent may reinspect a restaurant whenever an inspection or the investigation of a complaint reveals the existence of a violation that is potentially hazardous to the health and welfare of patrons or employees of the restaurant.
2. A reinspection shall be scheduled to allow the owner a reasonably sufficient time to correct the deficiencies.
3. A reinspection fee shall be charged for the reinspection according to Table ATCP 75.105 B or C, whichever is applicable, or the applicable charges as determined by an agent of the department.
4. If an additional reinspection is required because a violation has not been corrected in the scheduled time, the department shall assess the owner an additional reinspection fee according to Table ATCP 75.105 B or C, whichever is applicable, as authorized under s. ATCP 75.105. The department may order the owner to show just cause why the permit should not be suspended or revoked under s. ATCP 75.107. (2) GENERAL ORDERS TO CORRECT VIOLATIONS. (a) If upon inspection of a restaurant, the department or agent finds that the restaurant is not designed, constructed, equipped or operated as required under this subchapter, the department or agent shall issue a written order to correct the violation. The order shall specify the correction needed for compliance and the time period within which the correction should be made. The time period specified in the order may be extended at the discretion of the department or agent.
(b) If the order to correct violations is not carried out by the expiration of the time period stated in the order, or any extension of time granted for compliance, the department or agent may issue an order under s. ATCP 75.107 to suspend or revoke the permit to operate the restaurant.
(c) Under s. 97.12 (5), Stats., any person who fails to comply with an order of the department shall forfeit $50 for each day of

1. Prohibit the continued operation or method of operation of specific equipment.

2. Require the premises to cease operations and close until remedies are applied which eliminate the immediate danger to health or safety.

(b) 1. A temporary order shall take effect upon delivery to the operator or responsible supervisor. Except as provided in par. (c), the temporary order shall remain in effect for 14 days from the date of delivery, but a temporary order may be reissued for one additional 14-day period if necessary to complete any analysis or examination of samples, specimens, or other evidence.

2. No operation or method of operation prohibited by the temporary order may be resumed without the approval of the department or agent until the order has terminated or the time period specified by this paragraph has expired, whichever occurs first. If, upon completed analysis or examination, the department or agent determines that construction, sanitary condition, operation or method of operation of the premises or equipment does not constitute an immediate danger to health or safety, the department or agent shall immediately notify the owner, operator or responsible supervisor in writing and the temporary order shall terminate upon receipt of the written notice.

   3. To determine compliance with previously written violation orders.
   4. To secure samples or specimens.
   5. To examine and copy relevant documents and records provided such information is related to the operation of the vending machine, vending machine commissary, or vending machine commissary.
   6. To obtain photographic or other evidence needed to enforce this subchapter.

(b) **Reinspections.** 1. The department or its agent may reinspect a vending machine, vending machine commissary, or vending machine commissary storage whenever an inspection or the investigation of a complaint reveals the existence of a violation that is potentially hazardous to the health and welfare of patrons or employees of the vending machine, vending machine commissary, or vending machine commissary storage.

2. A reinspection shall be scheduled to allow the operator a reasonably sufficient time to correct the deficiencies.

3. A reinspection fee shall be charged for the reinspection according to Table ATCP 75.205 A or B, or applicable charges as determined by an agent of the department.

4. If an additional reinspection is required because a violation has not been corrected in the scheduled time, the department shall assess the operator an additional reinspection fee equal to the reinspection fee in Table ATCP 75.205 A or B, as applicable, as authorized under s. ATCP 75.205 (2) (d), and the department may order the owner to show just cause why the permit should not be suspended or revoked under s. ATCP 75.207.

2. **General orders to correct violations.** (a) If upon inspection of a vending machine, vending machine commissary, or vending machine commissary storage, the department or agent finds that the vending machine, vending machine commissary, or vending machine commissary storage is not designed, constructed, equipped or operated as required under this subchapter, the department or agent shall issue a written order to correct the violation. The order shall specify the correction needed for compliance.

(b) If the order to correct violations is not carried out by the expiration of the time period stated in the order, or any extension of time granted for compliance, the department or agent may issue an order under s. (a) As provided in s. 97.65, Stats., whenever the department or agent has reasonable cause to believe that an immediate danger to health or safety exists as a result of an inspection under sub. (1), the department or agent may issue a temporary order without advance notice or hearing to do any of the following:

1. Prohibit the continued operation or method of operation of specific equipment.

(c) If the analysis or examination shows that the construction, sanitary condition, operation or method of operation of the premises or equipment constitutes an immediate danger to health or safety, the department or agent, within the effective period of the temporary order specified in par. (b) 1. shall provide written notice of the findings to the owner, operator or responsible supervisor. Upon receipt of the notice, the temporary order remains in effect until a final decision is issued under s. ATCP 75.208. All foods, including beverages and ingredients, shall be stored, transported, displayed, and dispensed in such a manner as to be reasonably protected from dust, flies, vermin, contamination by rodents, insecticides, rodenticides, unnecessary handling, droplet infection, overhead leakage, and other contamination at all times. The wet storage of cartoned, bottled, canned, or packaged foods is prohibited.

(2) PACKAGING. Potentially hazardous food offered for sale through vending machines shall be dispensed to the consumer in the individual original container or wrapper into which it was placed at the commissary or at the manufacturer’s or processor’s plant, except the following:

(a) Foods with natural protective coverings which are not ordinarily eaten with the food, need not be wrapped or be in containers;

(b) Foods dispensed into an approved single−service container inside the vending machine immediately prior to delivery to the customer need not be wrapped or be in covered containers.
(3) Food temperatures. Potentially hazardous foods within a vending machine shall be maintained at a temperature not higher than 40°F (4°C) or a temperature not lower than 150°F (66°C). Canned foods are not potentially hazardous foods and for this reason are exempt from these temperature requirements. Frozen food shall be kept frozen at a temperature above 0°F (−18°C) or below except in vending machines with automatic defrosting in which the temperature shall not exceed 10°F (−12°C). Vending machines dispensing potentially hazardous foods shall be provided with adequate refrigeration or heating units and thermodynamic controls which ensure that these food temperatures are maintained at all times. These vending machines shall also have controls which prevent the machine from vending the potentially hazardous food in the event of power failure or other condition which permits the food to attain a temperature above 45°F (7°C) or below 150°F (66°C), whichever is applicable, until serviced by the operator. These temperature maintenance requirements do not apply to the actual time required to fill or otherwise service the machine and for a maximum period of 30 minutes following completion of filling or servicing operations.

(4) Thermometers. A thermometer accurate to ±2°F (1°C) shall be provided in the vending machine to indicate the air temperature of the warmest part of the cold food storage area of the machine or the coldest part of the hot food storage area of the machine, as applicable. This thermometer shall be visible to the employee during normal filling and servicing operations.

All single-service containers which receive food from machines dispensing these products in bulk, shall be purchased in sanitary cartons or packages which protect the containers from contamination, shall be stored in a clean dry place until used and shall be handled in a sanitary manner. The containers shall be stored in the original carton or package in which they were placed at the point of manufacture until introduced into the container magazine or dispenser of the vending machine. The vending machine magazine or dispenser shall protect the food contact surface of single-service articles from manual contact, dust, insects, rodents, and other contamination.

(b) Dispensing. All single-service articles with which food normally comes in contact, including straws, spoons, forks, and containers, shall be furnished to the customer in the original individual wrapper, unopened, or in a sanitary single-service dispenser approved by the department.

(3) Service connections. (a) Utility openings. All service connections through an exterior wall of the machine, including water, gas, electrical and refrigeration connections, shall be grommeted or closed to prevent the entry of insects and rodents.

(b) Closing methods. Grommets, clamps or other effective closures may be used. Where the opening is not used until the point of installation, the closure may be shipped with the machine in the packet form rather than in the installed position.

(c) Shipping bolt holes. Where shipping bolt holes are used, the holes shall be closed by the use of grommets, durable tapes, sealants, or reusable bolts provided by the manufacturer. These closures shall be easily identifiable or adequately described in the instruction manual for their intended use.

(d) Miscellaneous openings. Miscellaneous openings into the cabinet and through the cabinet wall other than coin entrance, coin returns and crown pullers, but including openings for optional service connections or alternate installations, shall be provided with effective closures by the manufacturer. The closures shall be provided for these not-in-use openings, and shall be easily identifiable, properly marked or adequately described in the instruction manual for their intended use.

(e) Disconnection safeguards. All service connections to utilities shall be of a type which will discourage their unauthorized or unintentional disconnection.

(4) Cleaning and sanitizing facilities. Approved facilities for cleaning and sanitizing equipment shall be available for each vending machine location or at a central location. If at a central location, reasonable precautions shall be taken to protect the product contact surfaces from contamination during storage, transportation, and installation. Facilities for cleaning and sanitizing shall include either permanently fixed sinks of adequate size which are used only for this or a similar purpose or there shall be portable washing facilities such as a service wagon, metal or plastic pails, or another mobile device which can be satisfactorily moved from one location to another. Sinks and portable receptacles shall be large enough to submerge at least 50% of the largest single piece of equipment or part of a vending machine which is to be cleaned and sanitized. Water used for cleaning product contact surfaces shall not be less than 110°F (43°C), shall contain an adequate amount of effective soap or detergent and shall be kept clean by changing it frequently.

(5) Manual sanitizing. Sanitizing of handwashed product contact surfaces shall be by one of the following methods:

(a) Submerge washed equipment for 30 seconds in clean water maintained at a temperature of 170°F (77°C) or more. Mechanized spray rinsing for a period of 10 seconds at 180°F (82°C) is also approved; or

(b) Submerge or rinse equipment following the washing operation in water at a minimum temperature of 110°F (43°C) to remove soap or detergent, and then submerge the equipment for at least 2 minutes in a hypochlorite solution which shall be made up with a chlorine concentration of at least 100 parts per million and shall be discarded when the chlorine concentration goes below 50 parts per million. Hypochlorite solutions shall be prepared fresh at least daily. Other sanitizing solutions may be used provided that use is at the concentration at which tested and approved by the department.

(6) Thermometers. The employee doing the cleaning shall be equipped with a thermometer which registers from 0°F (−18°C) to not less than 200°F (93°C) and has an accuracy of ±2°F (1°C) and shall use this thermometer to check water temperatures.

(7) Cleaned in place. In machines designed so that food-contact surfaces are not readily removable, all surfaces intended for in-place cleaning shall be designed and fabricated so that:

(a) Cleaning and sanitizing solutions can be circulated throughout a fixed system using an effective cleaning and sanitizing regimen;

(b) Cleaning and sanitizing solutions will contact all food-contact surfaces;

(c) The system is self-draining or capable of being completely evacuated; and

(d) The procedures used result in thorough cleaning and sanitizing of the equipment.

(2) TRANSPORTATION AND PLUMBING. Water used as a product ingredient shall be piped into the vending machine under pressure or brought to the vending machine in portable containers which have been filled directly from an approved water supply outlet. Portable containers shall be designed and maintained as food contact surfaces and shall be cleaned and sanitized, using the procedures established in s. ATCP 75.216 (4) and (5), at the commissary or other approved facility before each use. These containers and their contents shall be continuously protected against contamination during filling, transporting to the location, and sale of the product. All plumbing connections and fittings shall be installed in accordance with chs. SPS 382 and 383.

(3) WATER FILTERS. If used, water filters or other water-conditioning devices shall be of a type which may be disassembled for periodic cleaning or replacement of the active element. Replacement elements shall be handled in a sanitary manner.

(3) WASTE COLLECTION. (a) Containers shall be provided within all machines dispensing liquid products in bulk for the collection of drip, spillage, overflow, and other internal wastes.

(b) An automatic shutoff device shall be provided which will place the vending machine out of operation before a container overflows. The cutoff mechanism shall be set at a point to permit removal of the waste container from the machine without spillage.

(c) Containers and surfaces on which wastes may accumulate shall be readily removable for cleaning, easily cleanable, and corrosion resistant.

(4) WASTE CONNECTIONS. Liquid waste drainage pipes from a vending machine may not be connected to plumbing unless an air gap meeting the requirements of s. SPS 382.33 (7) (a) is provided.

(4) Reporting communicable diseases: (a) Food handlers who are known to be infected with a disease in a form that is communicable by food handling may be employed in activities involving food handling in a vending machine operation or a vending machine commissary.

(b) If the vending machine operator or the operator of a vending machine commissary suspects that any employee has contracted any disease in a communicable form that may be transmitted by food handling, the operator shall exclude the employee from any activities involving food handling and, in the case of a reportable communicable disease defined under s. DHS 145.03 (2), shall notify the local health authority immediately.

(5) CLEANLINESS.
