REPORT TO LEGISLATURE

NR 10, Wis. Adm. Code
Deer hunting as it relates to the control and eradication of chronic wasting disease

Board Order No. WM-11-06
Clearinghouse Rule No. 06-103

Basis and Purpose of the Proposed Rule

In 2002, the first chronic wasting disease (CWD) hunting rule was approved. At that time, we anticipated only needing to change the CWD zones map each year based on sampling results. However, we have annually reviewed all of the CWD hunting rules to see if changes are prudent. This review has involved analyses of both biological and social information. The proposed rules present some major compromises with hunters and landowners that are hoped to make this rule both adequate for herd reduction and sustainable from a social perspective. The proposed rule includes the following changes:

1. Provides an either-sex tagging regulation for the entire archery and gun deer season (no earn-a-buck).
2. Creates criteria where earn-a-buck regulations could be used again, if needed.
3. Shortens the early gun season in the Disease Eradication Zones from 18 days beginning in late October to 9 days beginning the Saturday preceding the Thursday closest to October 27.
4. Shortens the late gun season in both the Herd Reduction Zones and the Disease Eradication Zones by ending the season 3 Sundays after Thanksgiving, rather than January 3.
5. Creates criteria where the early gun season could be extended by 7 days, if needed.
6. Modifies the administrative code so that the archery season ends the same day as in non-CWD units, should that date change in future rules.
7. Modifies the dates of the Disease Eradication Zone state park gun hunting seasons to be consistent with CWD Zone hunts, with the exception that the early gun season hunting hours would close at noon.
8. Does not include boundary changes to CWD zones, specifically in unit 73B as requested by petitioners.

Therefore, under this proposal, hunters in the CWD Zones could expect the following season framework in 2006:

Archery season: September 16 to January 3
Early gun season: October 21-29 (DEZ); October 26-29 (HRZ)
Late gun season: November 18 to December 10
Tagging regulation: Unlimited either-sex, same tag for any deer
No change in boundaries

Summary of Public Comments

Approximately 160 people attended the public hearings. The most common comment was opposition to the 9-day October gun hunt. The next most common comment was a desire to return the gun season to the traditional 9-day hunt or a 16-day hunt. Comments were also received expressing a willingness to participate in earn-a-buck rules. Other comments were primarily targeted at CWD management rather than the rule and included: annual changes in season structure are confusing; DNR is spending a lot of money on CWD with no evidence it can be eradicated; opposition to government shooting; disappointment with the lack of public notice for the hearings; and concern that CWD management is causing the loss of landowner and hunter support and reducing the hunting experience and tradition.

A petition was delivered to the Dodgeville hearing requesting that Deer Management Unit 73BCWD be removed from the Herd Reduction Zone.

Modifications Made

The proposed 9-day October early gun season was modified to retain the 4-day early gun season.

Changes to Rule Analysis and Fiscal Estimate

The analysis and the fiscal estimate was modified to reflect that the early gun deer season would be for 4 days only in the herd reduction zone.

Response to Legislative Council Rules Clearinghouse Report

All but one of the changes recommended by the Legislative Council Rules Clearinghouse were incorporated into the final rule. The one change that was not incorporated related to form (2.a.). The recommendation was to omit the use of “units” and just use the term “unit” as the singular includes the plural and the plural includes the singular. While an appropriate comment, ch. NR 10 includes numerous references to “unit or units” and in each case the singular or plural is important to the meaning of the rule. We do not feel, with all of the existing references already in the code that these changes are critical to the current rule order. When reading deer hunting rules in ch. NR 10, it is clear that unit or units refers to deer management units.

Final Regulatory Flexibility Analysis

The revisions to ch. NR 10 relate to deer hunting and Chronic Wasting Disease management. These rules are applicable to individual sportspersons and impose no compliance or reporting requirements for small businesses, nor are any design or operational standards contained in the rule. Therefore, under s. 227.19(3m), Stats., a final regulatory flexibility analysis is not required.
