 Create New Appropriation
 Increase Existing Revenues
 Decrease Existing Revenues

Increase Costs - May be Possible to Absorb Within Agency's Budget Yes No

Decrease Costs

Local: No local government costs

1. Increase Costs
 Permissive Mandatory

3. Increase Revenues
 Permissive Mandatory

5. Types of Local Governmental Units Affected:

Towns Villages Cities
 Counties Others _____
 School Districts WTCS Districts

2. Decrease Costs
 Permissive Mandatory

4. Decrease Revenues
 Permissive Mandatory

Fund Sources Affected

GPR FED PRO PRS SEG SEG-S

Affected Ch. 20 Appropriations

Assumptions Used in Arriving at Fiscal Estimate

To implement the proposed electrical inspection program the Department proposes to establish a commercial building inspection agency registration. The agencies will be responsible for issuing permits and inspecting electrical wiring installations for farms, public buildings and places of employment. The inspections are required to be conducted by Department certified commercial electrical inspectors. Both municipalities and third-party independent inspection agencies will need to register with the Department. The cost of the registration would be \$40 for four years with an initial application fee of \$15. The Department estimates that 300 municipalities will elect to obtain the registration and 150 third-party independent inspection agencies will also register. Based upon these assumptions the Department revenues would increase by \$24,750 or approximately \$6,200 annualized. The 2009 Executive Budget Bill, AB75, includes 2 FTE positions to assist in the implementation of the electrical inspection program. The positions are to be funded by electrician licensing fees and the building inspection agency registration revenue of \$6,200.

The proposed electrical inspection program for farms, public buildings and places of employment will affect all electrical contractors installing electrical wiring in and for such establishments as well the owners or tenants of these types of buildings and structures. The issuance of the permits will result in periodic construction inspections by enforcing municipal or independent building inspection agencies under contract with the Department. The cost of the permits and the resulting inspections will be determined by the respective enforcing municipal inspection agency or by the state contract procurement process when involving an independent building inspection agency. Many of the more populous municipalities in the state currently administer electrical permit and inspection programs. Municipal electrical permits and inspections are typically determined on the basis of a base fee plus a cost for each electrical opening which varies with the size and type of building and occupancy.

Long-Range Fiscal Implications

No range fiscal implications are anticipated.
