| Assumptions Used in Arriving at Fiscal Estimate  Rule Summary:  The 2009-11 Biennial Budget included \$4.0 million in new bonding authority for the Dam Safety Grants. Funds are available to dam owners for maintenance, repairs, and removal. These proposed rule changes will improve the Department's ability to provide grants for these purposes and incorporate statutory language changes made in the budget bill. This will allow Wisconsin dam owners to address dam safety deficiencies at municipally owned dams and allow the owner of any dam to obtain funding to remove the dam as a means to mitigate safety deficiencies. The changes can be divided into two broad categories:  1.) Incorporate statutory changes into the existing grant codes: increases the maximum level of state contribution allowed under the grant programs from \$200,000 to \$400,000; varies the state contribution percentage for dam repair and reconstruction projects, depending on the size of the projects; increases the percentage of state contribution to 100% up to the maximum grant award for dam removal projects; eliminates statutory definition of "small dam" for dam removal grants; provides for an inventory of dam safety projects with a notification for dam owners; changes the definition of large dam to match change in s. 31.19, Stats.; and allows for cost effective, non-construction activities that increase the safety of a dam.  2.) Facilitate distributing the bonding for the program: moves grant application cycle for NR 335 to the fall to better match the municipal budget process; adjusts other code timelines and application requirements to address past implementation difficulties and assure more applications can be deemed complete; allows for the ability to adjust the priority ranking process outside the code, making it easier to improve the scoring process based on experience; better defines application requirements; allows for the addition of a variance clause which would facilitate the implementation and administration of NR 335; makes it easier for |                      |               |  |  |  |  |  |  |

Assumptions Used in Arriving at Fiscal Estimate - Continued

State Fiscal Effect: The 2009-2011 Budget Bill, 2009 Wisconsin Act 28, did not provide additional staff or funding for administering the dam grant programs, therefore, the costs associated with handling the additional demand for dam grants will be absorbed with existing staff and within the existing budget. It is assumed that the \$4 million in bonding will be allocated as soon as possible. Assuming an 8% annual amoritization rate, the allocation of the bonding will result in an annualized costs of \$320,000 in bonding repayments. However, these costs will occur regardless of the action on this rule package, so these costs are included in this fiscal note for information purposes only.

Local Fiscal Effect: The rule package makes it easier for municipalities, lake districts, and persons who own the dam to leverage grant funds and thus provides a greater financial incentive to apply for grants.
