RELATING Thermal Insulator Credentials  
TO:

1. Types of small businesses that will be affected by the rules.

Under 2009 Wisconsin Act 16, s. 101.136, Stats., on July 1, 2011 and the proposed rules only individuals licensed as insulation mechanics or working under the direct supervision of licensed insulation mechanics may install or maintain thermal system insulation. Thermal insulation is statutorily defined as a product that is used in a heating, ventilating, cooling, plumbing or refrigeration system to insulate any hot or cold surface, including a pipe, duct valve, boiler flue, or tank or equipment on or in a building. The credential rules would most likely affect HVAC contractors, plumbing contractors, and mechanical refrigeration contractors.

2. Reporting, bookkeeping and other procedures required for compliance with the rules.

The rules which reflect Act 16 allow acquisition of insulation mechanic license by completing an apprenticeship or taking and passing a department licensure exam provided the individual has 1,000 hours per year of experience for at least 4 consecutive years.

The renewal of thermal insulation mechanic licenses will continue to be contingent upon the fulfillment of continuing education obligations.

3. Types of professional skills necessary for compliance with the rules.

No other types of professional skills are necessary for compliance with the rules.

4. Rules have a significant economic impact on small businesses.
