WCD 10.01 Open and closed seasons. A closed season is established for each species of wild animal and bird named herein extending during all the time of each year except the open season period embraced within the specified dates, both inclusive. Such open season shall apply to all of the area described in each locality except as otherwise provided in Wis. Adm. Code chapters WCD 11 and WCD 15. Except as otherwise expressly provided, no person shall take, catch, kill, hunt, pursue, shoot, or trap any wild animal or bird at any time other than the open season and the established hunting hours therefore, nor in the open season in excess of the daily bag limit designated for each species, nor have any such protected wild animal or bird in his possession or under his control in excess of the possession limit. Whenever open and closed seasons are defined by highways, the boundary shall be the center line of the highway except as otherwise provided.

(a) By order of the secretary of the interior, the state of Wisconsin is permitted to harvest a total of 12,000 Canada geese in the area described in subsection WCD 10.01 (a) and (b). To exceed the allowable harvest in the states with an established quota will reduce the numbers of Canada geese in the Great Lakes flock of the Mississippi Flyway below the number established as the optimum level of the flock. The conservation commission also recognizes that certain conditions with respect to the flock and its available food supply, both on and off the refuge, may exist at the time the state harvest quota is reached which may create a depredation problem to agricultural crops in the area surrounding the refuge if gunning pressure is removed by closing the season on such lands thereby encouraging the flock to feed over a much wider area than the refuge proper.

It is, therefore, the intent of the conservation commission to authorize the following actions by the conservation director, by emergency order, as provided in Section 227.027, Wis. Stats., to resolve these problems in the best interest of the State of Wisconsin:

1. To close the open season for hunting geese in the area described in subsection WCD 10.01 (a) and (b) when the conservation director determines that the harvest of geese in such area has reached a total of 12,000 and that conditions do not exist for goose damage to ordinary feeding areas and for widespread depredations to agricultural crops if the season is closed.

2. If conditions are such that the food conditions and flock size may reasonably be expected to result in goose damage to ordinary feeding areas and in crop depredations over a larger area as a result of closing the season at the time the total harvest has reached the figure specified in subsection WCD 10.01 (1) (a) 1, to close the open season for hunting geese in the area described in subsection WCD 10.01 (1) (a) and (b) when the conservation director determines such conditions cease to exist; or to close the open season for hunting geese when such season is closed by order of the secretary of the interior, whichever date comes first.

3. To advance the daily opening shooting hours for waterfowl to an earlier hour in the area described in subsection WCD 10.01 (1) (a) when the conservation director determines the average daily rate of kill of Canada geese in the area described in subsection WCD 10.01 (1) (a) and (b) has fallen below 2% of the figure established in this subsection as the total harvest permitted in such area.

4. To restrict the open season for hunting waterfowl to odd numbered days of the month in the area described in subsection WCD 10.01 (1) (a) when the conservation director determines the average daily rate of kill of Canada geese in the area described in subsection WCD 10.01 (1) (a) and (b) has risen above 4% of the figure established in this section as the total harvest permitted in such area.
