A closed season is established for each variety of fish, crayfish and frogs named in this chapter extending during all the time of the year except the open season period embraced within the specified dates, both inclusive, and except as otherwise expressly provided no person shall take, catch or kill fish of any variety in excess of the daily bag limit and no person shall take, catch or kill fish, or fish for fish by any means other than hook or line, nor at any time other than the open season therefor, nor have in his possession or under his control any fish, crayfish, or frogs in excess of the possession limit, or below the minimum size therefor during the open season.

NR 20.03 Season tables; open and closed seasons, size and bag limits and measurements. (1) The open seasons specified in the following table apply to fishing in open waters and fishing through the ice, except that the department shall close the season for fishing through the ice in any inland waters when it finds after scientific investigation and study that continued fishing through the ice in such waters would result in a depletion of the supply of game fish therein and that such closed season is necessary to conserve the fish supply and insure the citizens of this state continued opportunities for good fishing therein and such closed seasons shall be put into effect by posting a notice thereof on or in the vicinity of the shore of the waters affected, such posting being deemed by the department to be the most feasible way of notifying the public that such closed season is in effect and such closed seasons shall remain in full force and effect so long as such waters are covered with ice and so long as such posting is continued. The department may also, following scientific investigation and study, establish bag limits and size limits on the individual inland waters when it finds that the taking of fish will aid in management of the fishery and insure the citizens of this state additional opportunities for good fishing. Such special regulations shall become effective only after public informational meetings are held. For open seasons in specified waters see s. NR 20.04. The possession limit for each species of fish shall be double the daily bag limit specified in this chapter except that no person shall have in his possession or under his control more than the daily bag limit while on the ice or waters or while fishing in the state of Wisconsin. The measurement of all fish taken shall be in a straight line from the tip of the snout to the utmost end of the tail fin fully extended.
