The Wisconsin Department of Industry, Labor and Human Relations proposes an order to repeal ch. Ind 69, ILHR 81.16, ILHR 81.38 and ILHR 81.65 (2); to amend ILHR 50.12 (5), ILHR 81.64 (1), ILHR 81.64 (4), ILHR 81.646 (2) and ILHR 81.67 (2) and (3); to repeal and recreate ILHR 81.66; and to create ch. ILHR 2, relating to program revenue fees.

ANALYSIS OF PROPOSED RULES

Statutory Authority: ss. 20.445 (1)(j), 101.19, 101.143 (2) and 168.12, and ch. 145

Statutes Interpreted: ss. 20.445 (1)(j), 101.19, 101.143 (2) and 168.12, and ch. 145

The Division of Safety and Buildings within the Department of Industry, Labor and Human Relations is responsible for administering and enforcing public safety rules relating to those services enumerated in the Statutes and funded from program revenue collected through user fees specified in chapter Ind 69. The Department, by rule promulgated under chapter 227, Stats., is required to fix and collect fees which should, as closely as possible, equal the cost of providing those services.

Much of the current program revenue fee schedule has been in effect since 1982. The resultant fees currently do not generate sufficient revenues to equal the cost of providing the program services. During fiscal year 1991, the total revenue generated from all program fees accounted for only 70 percent of the total costs.

A September 1989 evaluation of the Division by the Legislative Audit Bureau (LAB) recommended, "the Department proceed with its review and planned changes to its fee structure to reflect changes in programs, and to create more equitable fees" (page 24). LAB noted, furthermore, some of the observed program surpluses and deficits might be addressed if more equitable fees were assessed.

The proposed rules, therefore, consist of a combination of increases and decreases in the various fees to bring the projected revenue generated by each program area closer to 100 percent of program costs. Some programs, however, are unable to fully recover their costs without substantial increases in fees, and currently require subsidization by fees from other programs. In addition, changes to various fees attempt to take into account additional costs projected with the filling of vacant positions within the Division.

The overall goals of the proposed rules are as follows:

1. Make the fee schedule easier to read. In many cases, the public has found the code difficult to understand, and Division staff, sometimes, interprets the code differently. The proposed rules clarify the procedures.

2. Make the fees more uniform, wherever possible. In some instances, similar tasks, especially administrative duties, currently performed by the Division's bureaus are charged different fees. The proposed rules eliminate this situation as much as possible.
3. Make the fee schedule easier to amend. Wherever possible, similar tasks charging the same fees are combined into the same sections, thus allowing changes to be made more readily.
4. Make the fees easier to calculate. This point especially holds true for building plan review and inspections, where several subsections of text are incorporated into one table.
5. Adjust program fees to minimize subsidization by other programs.
6. Act upon LAB's recommendations.

The proposed rules do not amend the current fees in several program areas because of recent changes in those fees. There are no changes proposed in the amusement ride program fees (ILHR 2.20), the tramway, lift and towing devices inspection fees (ILHR 2.21), and the petroleum-related program fees (sections ILHR 2.41 - 2.44).

The Division will closely monitor its fees and program revenue reserve through an internal policy, which is also currently being revised, developed in September 1986. This policy is the result of a study which examined the issues of frequency of fee adjustments, parameters to correlate fees and costs, and appropriate reserve levels. The revised policy will include methodologies on how general purpose revenue should be used and administrative overhead costs should be allocated.

A 1989 report by the Bureau of Labor Market Information within the Department projected an upward trend in overall industry employment through the year 2000. However, fluctuations in private sector employment and, likewise, revenues may occur. What this implies is the Division may experience a natural growth in overall revenues for some time. Increased Division workload, then, may require additional staffing and will help to maintain the desired reserve level.

While these trends are only based upon projections, they will provide the Division with some valuable insight as to what may be expected for revenue in the upcoming years. The Division will take this information into consideration for future changes in the fee schedule.

In conclusion, therefore, the proposed rules both comply with the recommendations of LAB and bring as many program areas to full cost recovery as possible.

SECTION 1. Chapter Ind 69 is repealed.

SECTION 2. Chapter ILHR 2 is created to read:
