

## FINAL REGULATORY FLEXIBILITY ANALYSIS

Natural Resources Board Order AM-07-15, Clearinghouse Rule 16-041

This rule adopts the 2012 annual primary PM<sub>2.5</sub> National Ambient Air Quality Standard (NAAQS) into state administrative code. The Department does not anticipate that this rule will have any economic impact on small businesses. All areas of the state are attaining the new standard. The new standards do not result in any new regulatory requirements for stationary sources.
