Assumptions Used in Arriving at Fiscal Estimate:

The proposed rules implement changes required to administer the provisions of 2017 Wisconsin Acts 2 and 59, as well as to make other minor technical changes. These rules are intended to reflect and clarify existing law, and as such do not have any fiscal impact.

The proposed rule makes the following changes:

- Updating email and website addresses
 The current rules provide information for taxpayers to find certain forms or contact the department. The forms and contacts still exist, but the email or internet addresses need to be updated in some cases.
- Updating procedures relating to power of attorney forms
 Most substantively, the power of attorney form applies to a variety of taxes and credits administered by the department. Because unclaimed property matters are now administered by the department as well, the rule clarifies that the form also applies to unclaimed property. Moreover, the rule change clarifies the information required by the department if the taxpayer chooses to submit an alternate power of attorney form rather than the form provided by the department.
- Repeal ambulatory surgical center assessment
 Current rule establishes procedures and other requirements necessary for administering the ambulatory surgical center assessment. Ambulatory surgical center assessments have since been repealed in statute, and therefore no longer relevant.
- Remove references to obsolete forms
 The department has replaced form I-827 by including a residence questionnaire in form 1-NPR. The rule change updates the reference to reflect that change.
- Update electronic and other filing requirements

Long-Range Fiscal Implications:

--	--	--------------------------

Prior to 2018, statute required a number of information returns be filed electronically if the filer submitted 50 or more such returns. In 2017 Wis. Act 59, the limit was changed from 50 to 10, so the rule change updates the references to the new limit. Similarly, the rule change removes old references that required tax preparers to file electronically if they submitted a certain 100 or 200 returns. That requirement is now for 50 or more returns.

- Remove obsolete reference to health insurance credit
Current law does not include a health insurance credit as part of the federal EITC. This rule change removes the health insurance credit reference from the rules and updates the relevant description of the federal EITC to reflect current law.
- Reference statutory limitations related to net business and operating losses
Changes to a net operating or business loss carryforward may not be made unless the change to the incurred loss was computed on a return that was filed within four years of the unextended due date for filing the original return. The provision adds that statutory reference to Tax 2.105 (4) (b) and 2.12 (3) (c).
- Remove line references to forms
Several current rules refer to specific items on federal forms and also lists the line numbers on those forms. The federal line numbers change relatively often, but the specific items being referenced on the federal forms are still present on different lines. This change removes the incorrect line references in the rules, but retains the correct item names and form numbers.
- Update date and other references to the Internal Revenue Code
In some cases the current rules refer to old federal IRC provisions. Federal law changes require that the rules have new federal references to retain the correct meaning.
- Add exception for broadcaster's gross receipts to receipts for intangible property included in sales factor
When calculating the sales factor, there are exceptions for intangible property. The rule change clarifies those exceptions for receipts of intangible property relating to broadcaster's apportionment.
- Update sourcing of sales of services
The rule change updates a reference to federal rules concerning sourcing of sales of services. Previously, the reference was to IRC chapter 861. That has since been changed to IRC subchapter N.
- Repeal alternative method of apportionment
The current rule references Tax 2.395, which has only allowed petitions if filed prior to January 1, 2000. This proposed rule deletes the reference to Tax 2.395.
- Provide no interest is paid on certain WEDC refunds
Current law does not provide interest to be paid on certain WEDC refunds. The rule change adds lines clarifying that no interest shall be paid on certain WEDC refunds.
- Add limitation to credit for tax paid to another state
Effective beginning in 2017 the Wisconsin credit for taxes paid to another state is limited to the amount of tax paid to Wisconsin on the income that is taxable to both states. This rule change contains updated descriptions of the credit and updated examples calculations that reflect the law change.
- Repeal notes relating to obsolete disasters
The rules provide information related to claiming casualty losses from disasters and include notes regarding specific past disaster declarations. Since the specifically listed disaster declarations are no longer within the statute of limitations, those references are no longer necessary.
- Update homestead credit references related to disqualified losses
Effective beginning in 2018 certain disqualified losses must be added back to income for homestead purposes. Existing rules are intended to clarify the meaning of household income and income for homestead credit purposes. This change includes disqualified losses in the rule to accurately reflect the statute.
- Repeal subdivision renumbered and not deleted and error
A rule describing items that must be added back to income for homestead credit purposes was previously renumbered, but not removed from the original location. That resulted in duplicative information in Tax 14.03 (4) (b) 23 and Tax 14.03 (4) (c). This change fixes the duplication by removing the information in Tax 14.03 (4) (b) 23.
